

# **Stellar Repair for Exchange**

**User Guide for version 9.5**

# 1. About Stellar Repair for Exchange

**Stellar Repair for Exchange** provides you a complete solution to repair corrupt Microsoft Exchange database files. The software repairs corrupt EDB files and restores all its data such as e-mails, attachments, contacts, calendars, notes, tasks and journals. **Stellar Repair for Exchange** scans and extracts data from a corrupt EDB file, repair it and then saves it in PST, Public Folder, Live Exchange, Office 365, MSG, EML, RTF, PDF and HTML format.

After repairing the EDB file, the software shows its original data. All folders from the original EDB file are shown along with their data in a three-pane structure.

## Key features of Stellar Repair for Exchange:

- **Output Supported:** Repair and export EDB files to Live Exchange Server, Public Folder and Microsoft Office 365 or save in PST, MSG, EML, RTF, PDF and HTML format.
- **Support for Multiple File Repair:** Scans and repairs up to four EDB files in a single process.
- **Preview Option:** Provides preview of mailboxes and mailbox items such as - Mails, Attachments, Calendar, Contacts, Tasks, Notes, Search, and Journal.
- **Selective Repair Option:** Provides option to select and repair only the mailboxes that you require.
- **Search and Filter data:** Provides option to search for required mails and to filter the scanned results before saving.
- **Support for Archive Mailboxes:** Supports repair of archived mailboxes in EDB files.
- **Option for Saving MS Exchange Generated Folders:** Provides option to include or exclude **MS Exchange generated folders** from your output (For Microsoft Exchange 2010 or above versions).
- **Support for Multiple Mailboxes while Saving:** Supports all saving options for multiple mailboxes.
- **Support for Exporting data to Public Folder:** Supports exporting selective data to **Public folder of Live Exchange Server and Office 365** account.
- **PUB.EDB files:** Supports repairing of PUB.EDB files.
- Supports Microsoft Office 2019, 2016, 2013, 2010 and 2007.
- Supports Microsoft Exchange Server 2019, 2016, 2013, 2010, 2007, 2003, 2000 and 5.5.
- Compatible with Windows 10, Windows 8.1, Windows 8, Windows 7, Windows Server 2016, Windows Server 2012 and Windows Server 2008.

## 1.2. About the guide

This user guide contains sequential steps to assist you through various **Stellar Repair for Exchange** functions. Each function is explained in details, in the corresponding sections. The guide covers following major topics:

1. General Information
2. Getting Started
3. Working with the Software
4. Frequently Asked Questions (FAQ)

This guide has the following features for easy navigation and understanding:

- There are **Notes** and **Tips** in some topics of this guide for better understanding and ease of work. These **Notes** and **Tips** are given in *italics* style.

## **1.3. Stellar Support**

Our Technical Support professionals will give solutions for all your queries related to Stellar products.

# END USER LICENSE AGREEMENT

PLEASE READ THIS AGREEMENT CAREFULLY. BY DOWNLOADING, INSTALLING, COPYING, ACCESSING OR USING THIS SOFTWARE, ALL OR ANY PORTION OF THIS SOFTWARE, YOU (HEREINAFTER "CUSTOMER") ACCEPT ALL THE TERMS AND CONDITIONS OF THIS AGREEMENT WHICH WILL BIND YOU. THE TERMS OF THIS LICENSE INCLUDE, IN PARTICULAR, LIMITATIONS ON LIABILITY CLAUSE. IF YOU DO NOT AGREE TO THE TERMS OF THIS LICENSE, WE WILL NOT LICENSE THE SOFTWARE AND DOCUMENTATION TO YOU AND YOU MUST DISCONTINUE THE INSTALLATION PROCESS NOW, AND PROMPTLY RETURN THE SOFTWARE AND PROOF OF ENTITLEMENT TO THE PARTY FROM WHOM YOU ACQUIRED THE SOFTWARE.

## 1. DEFINITIONS.

1.1. "**Stellar**" means Stellar Information Technology Pvt. Ltd., having its registered office at 205, Skipper Corner, 88, Nehru Place, New Delhi, India 110019.

1.2. "**Compatible Computer**" means a Computer with the recommended operating system and hardware configuration as stated in the Documentation.

1.3. "**Computer**" means a virtual or physical device that accepts information in digital or similar form and manipulates it for a specific result based on a sequence of instructions, including without limitation desktop computers, laptops, tablets, mobile devices, telecommunication devices, Internet-connected devices, and hardware products capable of operating a wide variety of productivity, entertainment, or other software applications.

1.4. "**Customer**" means you and any legal entity that obtained the Software and on whose behalf it is used; for example, and as applicable, your employer.

1.5. "**Permitted Number**" means one (1) unless otherwise indicated under a valid license (e.g., volume license) granted by Stellar.

1.6. "**Software**" means (a) all of the information with which this agreement is provided, including but not limited to: (i) all software files and other computer information; (ii) any proprietary scripting logic embedded within exported file formats (iii) images, sounds, clip art, video and other works bundled with Stellar software or made available by Stellar on Stellar's website for use with the Stellar software and not obtained from Stellar through a separate service (unless otherwise noted within that service) or from another party ("Content Files"); (iv) related explanatory written materials and files ("Documentation"); and (v) any modified versions and copies of, and upgrades, updates, and additions to, such information, provided to Customer by Stellar at any time, to the extent not provided under separate terms (collectively, "Updates").

## 2. LICENSE GRANT; PROPRIETARY RIGHTS.

**Right to use the Software:** Subject to the terms and conditions of this Agreement, Stellar grants Customer a non-exclusive, non-transferable right, revocable and limited license to access and use the Software and Documentation on a single computer or workstation in a single location for your personal purposes (if you are a consumer) or your internal business purposes (if you are a business user) subject to the terms stated below. Customer must use the Technician License if using the software to provide professional or paid service to a third party (individual or company) and / or for any commercial purposes.

**SINGLE USER LICENSE.** The term means a SOFTWARE that may be installed and used only by a single USER on a single computer at any one time. Consequently, the SOFTWARE must not be installed, displayed, shared or used concurrently from the computer or on distinct computers. Single User License is granted to customer who is using STANDARD, PROFESSIONAL, PREMIUM or CORPORATE Edition of the Software.

**MULTIPLE USER LICENSE.** The term means a SOFTWARE that may be installed and used by a specified number of USERS representing an equivalent number of computers. The SOFTWARE must not be installed, displayed, shared or used from or on a number of computers greater than the number of workstations authorized. Multiple User License are associated with Technician & Toolkit Edition of the Software. MAXIMUM Installation and usage limit of this License is on 3 Computers.

### **3. LICENSE TYPES.**

**3.1. Evaluation Software/Trial version:** The Software is provided with or without License key which can be downloaded for free from Stellar's website. The Software may only be installed and used on Permitted Number of Compatible Computers during the License Term for demonstration, evaluation, and training purposes only. Evaluation Software or Trial version of the Software may be freely distributed, if the distribution package is not modified. No person or company may charge a fee for the distribution of trial version without written permission from the copyright holder.

**3.2. Subscription License:** For the Software available on a subscription-basis ("Subscription License"), Customer may install and use the Subscription License only on the Permitted Number of Compatible Computer during the License Term Period. Subject to the Permitted Number of Computers for the Subscription License, Customer agrees that Stellar may change the type of Software (such as specific components, versions, platforms, languages, etc.) included in the Subscription License at any time and shall not be liable to the Customer whatsoever for such change. Ongoing access to a Subscription License requires a recurring Internet connection to activate, renew, and validate the license. If Stellar does not receive the recurring subscription payment or cannot validate the license periodically, then the Software may become inactive without additional notice until Stellar receives the payment or validates the license.

**3.3. Lifetime License:** Once registered, user is granted an exclusive license to use the Software for maximum period of 10 years on the same computer with same configuration and operating system which is compatible with the software. If the computer hardware or software is changed during the lifetime of the license which is not compatible with the original purchased version; then user may need to additionally purchase the upgraded version of the software.

### **4. SOFTWARE SUPPORT.**

Support will only be provided to only license customer for a period of 1 Year from the date of purchase. Queries regarding the installation and use of the software should be submitted by e-mail which get responded usually within 24 Business Hours. Free Technical Support is provided for 1 Year from the date of purchase, if your license term is greater than 1 year then you may avail Technical Support by paying additional fee applicable at that time. Paid support can be purchased for Lifetime License only up to a maximum period of next 2 years. Stellar will not assist customers for any support request related to the Software after 3 years from the purchase of the software.

### **5. INTELLECTUAL PROPERTY OWNERSHIP.**

The Software and any authorized copies that Customer makes are the intellectual property of and are owned by Stellar. The structure, organization, and source code of the Software are the valuable trade secrets and confidential information of Stellar Information Technology Pvt. Ltd. The Software is protected by law, including but not limited to the copyright laws of the United States and other countries, and by international treaty provisions. Except as expressly stated herein, this agreement does not grant Customer any intellectual property rights in the Software. All rights not expressly granted are reserved by Stellar.

## **6. RESTRICTIONS & REQUIREMENTS.**

6.1     Proprietary Notices. Any permitted copy of the Software (including without limitation Documentation) that Customer makes must contain the same copyright and other proprietary notices that appear on or in the Software.

6.2     Use Obligations. Customer agrees that it will not use the Software other than as permitted by this agreement and that it will not use the Software in a manner inconsistent with its design or Documentation.

6.3     No Modifications. Customer shall not modify, adapt, tamper with, translate or create Derivative Works of the Software or the Documentation; combine or merge any part of the Software or Documentation with or into any other software or documentation; or refer to or otherwise use the Software as part of any effort to develop software (including any routine, script, code, or program) having any functional attributes, visual expressions or other features similar to those of the Software to compete with Stellar; except with Stellar's prior written permission, publish any performance or benchmark tests or analysis relating to the Software;

6.4     No Reverse Engineering. Customer shall not reverse engineer, decompile, disassemble, or otherwise attempt to discover the source code of the Software.

6.5     No Unbundling. The Software may include various applications and components, may allow access to different Stellar Online Channels, may support multiple platforms and languages, and may be provided to Customer on multiple media or in multiple copies. Nonetheless, the Software is designed and provided to Customer as a single product to be used as a single product on Computers as permitted herein. Unless otherwise permitted in the Documentation, Customer is not required to install all component parts of the Software, but Customer shall not unbundle the component parts of the Software for use on different Computers.

6.6     Customer will not remove, erase, obscure or tamper with any copyright or any other product identification or proprietary rights notices, seal or instructional label printed or stamped on, affixed to, or encoded or recorded in or on any Software or Documentation; or fail to preserve all copyright and other proprietary notices in all copies Company makes of the Software and Documentation;

6.7     Customer will not run or operate the Software in a cloud, Internet-based computing or similar on-demand computing environment unless Company's Grant Letter or the applicable Product Entitlement Definitions specifically allows the use.

6.8     No Transfer. Customer will not rent, lease, sell, sublicense, assign, or transfer its rights in the software (including without limitation, software obtained through a web download), or authorize any portion of the software to be copied onto another individual or legal entity's computer except as may be expressly permitted herein.

## **7. COPYRIGHT/OWNERSHIP.**

Customer acknowledges that all intellectual property rights in the Software and the Documentation anywhere in the world belong to, or are licensed to Stellar. The rights granted to you in the Software are licensed (not sold), and you have no rights in, or to, the Software or the Documentation other than the right to use them in accordance with the terms of this License. The Software, its source code and Documentation are proprietary products of Stellar Information Technology Pvt. Ltd. (“Stellar”) to provide the License and are protected by copyright and other intellectual property laws. Stellar shall at all times retain all rights, title, interest, including intellectual property rights, in the Software or Documentation.

## **8. WARRANTIES.**

The licensed software (excluding the media on which it is distributed) and all Stellar related websites and services are provided to licensee ‘AS IS’ and “AS AVAILABLE,” and Stellar and its suppliers and licensors make NO WARRANTY as to their use or performance. Stellar and its suppliers and licensors make NO WARRANTIES OR REPRESENTATIONS (express or implied, whether by statute, common law, custom, usage, or otherwise) as to any matter including without limitation to quality, availability, performance or functionality of the licensed software or any related Stellar websites or services; quality or accuracy of any information obtained from or available through use of the licensed software or related Stellar websites or services; any representation or warranty that the use of the licensed software or any related Stellar websites or services will be uninterrupted or always available (whether due to internet failure or otherwise), error-free, free of viruses or other harmful components or operate on or with any particular hardware, platform or software; non-infringement of third-party rights, merchantability, integration, satisfactory quality, or fitness for any particular purpose, except for, and only to the extent, that a warranty may not be excluded or limited by applicable law in licensee’s jurisdiction.

## **9. DATA PROTECTION.**

You understand that by using the Licensed Software, you consent and agree to the collection and use of certain information about you and your use of the Licensed Software in accordance with Stellar’s Privacy Policy. You further consent and agree that Stellar may collect, use, transmit, process and maintain information related to your Account, and any devices or computers registered thereunder, for purposes of providing the Licensed Software, and any features therein, to you. Information collected by Stellar when you use the Licensed Software may also include technical or diagnostic information related to your use that may be used by Stellar to support, improve and enhance Stellar’s products and services. For more information please read our full privacy policy at “<https://www.stellarinfo.com>”, on the section Privacy Policy. You further understand and agree that this information may be transferred to the United States, India and/or other countries for storage, processing and use by Stellar, its affiliates, and/or their service providers. You hereby agree and consent to Stellar’s and its partners’ and licensors’ collection, use, transmission, processing and maintenance of such location and account data to provide and improve such features or services.

## **10. INTERNET CONNECTIVITY & PRIVACY.**

10.1 Automatic Connections to the Internet. The Software may cause Customer’s Computer, without notice, to automatically connect to the Internet and to communicate with Stellar website or Stellar domain for purposes such as

license validation and providing Customer with additional information, features, or functionality. Unless otherwise specified in Sections 10.2 through 10.5, the following provisions apply to all automatic Internet connections by the Software:

10.1.1 Whenever the Software makes an Internet connection and communicates with a Stellar website, whether automatically or due to explicit user request, the Privacy Policy shall apply. Stellar Privacy Policy allows tracking of website visits and it addresses in detail the topic of tracking and use of cookies, web beacons, and similar devices.

10.1.2 Whenever the Software connects to Stellar over the Internet, certain Customer information is collected and transmitted by the Software to Stellar pursuant to the Stellar Online Privacy Policy available at <https://www.stellarinfo.com/> under Privacy Policy section.

10.1.3 If Customer accesses Stellar Online Service or activates or registers the Software, then additional information such as Customer's ID, user name, and password may be transmitted to and stored by Stellar pursuant to the Privacy Policy and additional terms of use related to such Stellar Online Service.

10.1.4 Stellar, unless barred under applicable law, may (a) send Customer transactional messages to facilitate the Stellar Online Service or the activation or registration of the Software or Stellar Online Service, or (b) deliver in-product marketing to provide information about the Software and other Stellar products and Services using information including but not limited to platform version, version of the Software, license status, and language.

10.2 **Updating.** The Software may cause Customer's Computer, without additional notice, to automatically connect to the Internet (intermittently or on a regular basis) to (a) check for Updates that are available for download to and installation on the Computer and (b) notify Stellar of the results of installation attempts.

10.3 **Activation.** The Software may require Customer to (a) obtain Stellar Software Activation Key, (b) activate or reactivate the Software, (c) register the software, or (d) validate the Ownership. Such requirement may cause Customer's Computer to connect to the Internet without notice on install, on launch, and on a regular basis thereafter. Once connected, the Software will collect and transmit information to Stellar. Software or Customer may also receive information from Stellar related to Customer's license, subscription, or Ownership. Stellar may use such information to detect or prevent fraudulent or unauthorized use not in accordance with a valid license, subscription, or Ownership. Failure to activate or register the Software, validate the subscription or Ownership, or a determination by Stellar of fraudulent or unauthorized use of the Software may result in reduced functionality, inoperability of the Software, or a termination or suspension of the subscription or Ownership.

10.4 **Use of Online Services.** The Software may cause Customer's Computer, without additional notice and on an intermittent or regular basis, to automatically connect to the Internet to facilitate Customer's access to content and services that are provided by Stellar or third parties. In addition, the Software may, without additional notice, automatically connect to the Internet to update downloadable materials from these online services so as to provide immediate availability of these services even when Customer is offline.

10.5 **Digital Certificates.** The Software uses digital certificates to help Customer identify downloaded files (e.g., applications and/or content) and the publishers of those files. For example, Stellar uses digital certificates to help Customer identify the publisher of Stellar applications. Customer's Computer may connect to the Internet at the time of validation of a digital certificate.

## **11. LIMITATION OF LIABILITY**

In no event shall Stellar or its suppliers be liable for any special, incidental, indirect, or consequential damages whatsoever (including, without limitation, damages for loss of business profits, business interruption, loss of business information, or any other pecuniary loss) arising out of the use of or inability to use the software product or the provision of or failure to provide support services, even if Stellar has been advised of the possibility of such damages. In any case, Stellar's entire liability under any provision shall be limited to the amount actually paid by you for the software product or a sum of US Dollars Five whichever is higher.

## **12. TERMINATION**

If Customer breaches this EULA, and fails to cure any breach within 30 calendar days after request from Stellar, Stellar may terminate this EULA, whereupon all rights granted to Customer shall immediately cease including but not limited to the license granted to the customer to use the software which shall also stand revoked. Furthermore, upon termination, Customer shall return to Stellar all copies of the Licensed Software, or verify in writing that all copies of the Licensed Software have been destroyed and failure of the customer to do so would entitle Stellar to sue for relief in equity and damages.

## **13. JURISDICTION AND LAW**

13.1 This EULA is subject to, and will be governed by and construed in accordance with the substantive laws applicable to the state of Delhi (India). Courts at Delhi, India alone shall have the jurisdiction to entertain any dispute arising out of the terms and conditions of this EULA and you consent to such jurisdiction of the courts at Delhi, India.

13.2 This EULA will not be governed by the conflict of law rules of any jurisdiction, or the United Nations Convention on Contracts for the International Sale of Goods, the application of which is expressly excluded.

## **14. GENERAL**

14.1 This License is the complete statement of the agreement between the parties on the subject matter and merges and supersedes all other or prior understandings, purchase orders, agreements and arrangements.

14.2 The exclusions of warranties and liability limitations shall survive the termination of this EULA, howsoever caused; but this survival shall not imply or create any continued right to use the Licensed Software after termination of this EULA.

14.3 Licensee shall not ship, transfer, or export Licensed Software into any country or use Licensed Software in any manner prohibited by the applicable export control laws, notably where applicable, the United States Export Administration Act, restrictions, or regulations (collectively the 'Export Laws'.) All rights to use the Licensed Software are granted on condition that Licensee complies with the Export Laws, and all such rights are forfeited if Licensee fails to comply with the Export Laws.

14.4 Stellar reserves all rights not expressly granted to Licensee by this EULA All rights are reserved under the copyright laws of India and/or of other countries, to Stellar Information Technology Pvt Ltd, having its registered office at 205, Skipper Corner, 88, Nehru Place, New Delhi, India 110019.

14.5 There are no third party beneficiaries of any promises, obligations or representations made by Stellar herein.

14.6 Any waiver by Stellar of any violation of this License by you shall not constitute nor contribute to a waiver by Stellar of any other or future violation of the same provision or any other provision of this License.

14.7 This EULA constitutes the entire agreement between you and Stellar and it supersedes all prior or contemporaneous representations, discussions, undertakings, communications, agreements, arrangements, advertisements, and understandings regulating the Licensed Software. This EULA is binding on and made for the benefit of the parties and their successors and permitted assigns.

14.8 This EULA may only be modified, supplemented or amended by a writing signed by an authorized officer of Stellar.

About

## 2.4.3. Preview Tabs

Stellar Repair for Exchange provides options to navigate between **Mails**, **Calendar**, **Contacts**, **Tasks**, **Notes**, **Search**, and **Journal** views at the bottom of the left pane. It also allows to modify/reset the **Navigation Pane Options**.

- Click on **Mail** icon to view the mails of the scanned mailbox.

A screenshot of the Stellar Repair for Exchange software interface. The top navigation bar includes Home, View, Tools, Calendar, Activation, Help, and Buy Now. Below the navigation bar is a toolbar with icons for Select EDB File, Save, Print Message, Scan, Layout, Scan Info, and Scan Info. The main window has a sidebar titled 'Mail' containing a tree view of mailbox items like user12, Calendar, Contacts, Conversation Actions, Conventions, Deleted Items, Drafts, Junk, Junk Email, Junk E-Mail, Mailbox Quotas, MailboxRestrictions, News Feed, Notes, Outbox, Quick Step Settings, RSS Feeds, Sent Items, Suggested Contacts, Sync Issues, Tasks, Unknown, Working Set, and Help. The central area shows a table with columns: From, To, Subject, Date, and Preview. The preview pane shows a detailed view of an email message from 'Eddy (envelope)' to 'Eddy, Randy' with subject 'FW: invitation for dinner\_ Friday 10/03/2018 (bcc:all)' and attachments 'Bengali.txt'. The bottom status bar indicates 'Basic 102'.

- Click on **Calendar** icon to view the Calendar functions scanned mailbox. It displays the schedules in an organized and efficient manner.

A screenshot of the Stellar Repair for Exchange software interface, specifically the Calendar view. The top navigation bar and toolbar are identical to the Mail view. The main window shows a calendar grid for December 2017 and January 2018. The calendar is color-coded by day of the week (Monday-Sunday). A sidebar on the left lists contacts: data13, exportN, garis, Harry, and Birthdays. The central area shows a weekly calendar view with various events and appointments. For example, in December, there are several entries for 'Appointment for list of graduates salary' and other scheduled tasks. The bottom status bar indicates 'Basic 2'.

Calendar function also allows to efficiently display the schedule for a day, work week, week, or month.

|  |   |
|--|---|
| <br>Day                             | Click this button to list all the entries of one particular day from the calendar.  |
| <br>Work Week                       | Click this button to list all the entries of a work week (from Monday to Friday).   |

| Hamilton 518.949Map | Just over 30 cities and t... | How the heart works | 10 Interesting... if you're like... |

- Click on **Search**

| Any Criteria | Exact Match | From | To | Subject | Date | Path |
|--------------|-------------|------|----|---------|------|------|
|              |             |      |    |         |      |      |

- Click on **Journal** icon to view the created journal entries of the scanned mailbox.

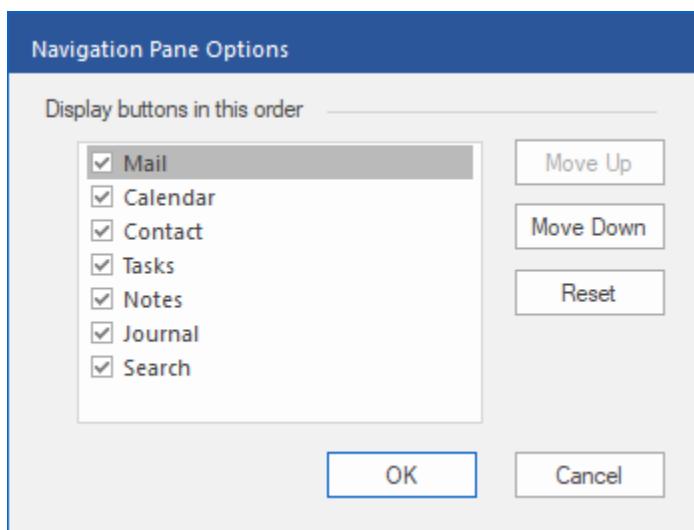

The screenshot shows the Stellar Repair for Exchange interface. The ribbon bar at the top has tabs for Home, View, Tools, Calendar, Advanced, Help, and Buy Now. Below the ribbon is a toolbar with icons for Select EDB File, Open, Find Message, Save Scan, Load Scan, and Scan Info. The main window is titled 'Journal' and shows a tree view of scanned mailboxes under 'G:\EDB\EDB 2013\Latest\01-Jan-2019\scanned'. One mailbox, 'HealthMailbox-51pmail-test', is expanded to show its contents. To the right of the tree view is a table listing journal entries. The columns are 'Subject' and 'Start Date'. The entries are:

| Subject  | Start Date         |
|--|--------------------|
| recording phone call (jessica@jessicas-mac)                | 2/5/2019 10:22 AM  |
| Recording Remote session (D:\christina\OneDrive - Kurdish) | 2/7/2019 10:51 AM  |
| Recording Task (D:\christina\OneDrive - test)              | 2/26/2019 10:56 AM |
| Recording Task Response                                    | 2/26/2019 11:09 AM |

- Click on **...** and select **Navigation Pane Options**. This will open the **Navigation Pane Options** dialog box.

To modify/reset the navigation pane options:

- Check/uncheck the preview tab that you want to add/ remove from the list.
- Click **Move Up/ Move Down** button to modify the order of the preview tabs. **Move Up** button will shift the desired tab upwards and **Move Down** button will shift the desired tab downwards in the list.
- Click **Reset** to go back to the default list of preview tabs.
- Click **OK** to save the changes.

## 2.5. Ordering the Software

Click <https://www.stellarinfo.com/edb-exchange-server-recovery.htm> to know more about **Stellar Repair for Exchange**.

To purchase the software online, please visit <https://www.stellarinfo.com/email-repair/edb-recovery/buy-now.php>

Alternatively, click **Buy Online** button in **Buy Now** ribbon on **Ribbon Bar** to purchase the software online.

Select either of the methods given above to purchase the software.

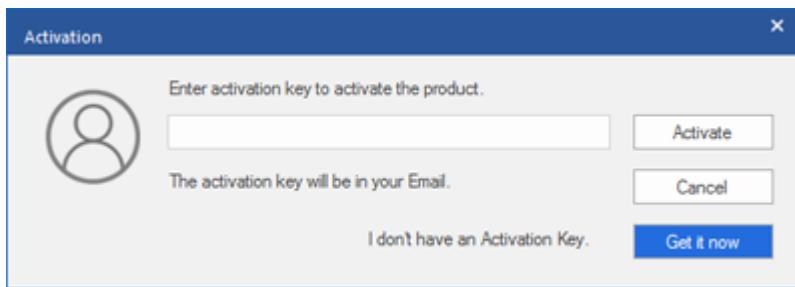

Once the order is confirmed, a serial number will be sent to you through e-mail, which would be required to activate the software.

## 2.6. Activating the Software

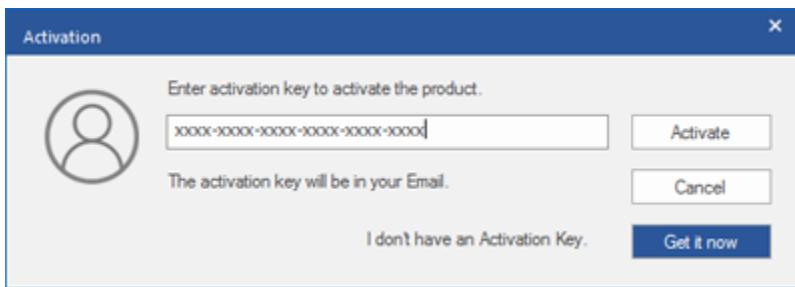

The demo version is just for evaluation purposes and must be eventually activated to use the full functionality of the software. The software can be activated using the Activation Key that you receive via email after purchasing the software.

### To activate the software:

1. Run the demo version of **Stellar Repair for Exchange** software.
2. On the main user interface, click the **Activation** button in **Activation** ribbon icon. The **Activation** dialog is displayed as shown below:

3. If you don't have the activation key, click the **Get it now** button in the dialog to go online and purchase the product.
4. Once the order is confirmed, an Activation Key will be sent to the email provided.
5. Type the **Activation Key** (received through email after purchasing the product) and click **Activate** button (Please ensure that you have an active Internet connection).

6. The software will automatically communicate with the license server to verify the entered key. If the key you entered is valid, the software will be activated successfully.
7. The '**Activation completed successfully**' message is displayed after the process gets completed successfully. Click **OK**.

## 2.7. Updating the Software

Stellar releases periodical software updates for **Stellar Repair for Exchange** software. You can update the software to keep it up-to-date. These updates can add a new functionality, feature, service, or any other information that can improve the software. Update option of the application is capable of checking for latest updates. This will check for both latest minor and major versions available online. You can easily download minor version through the update wizard. However, the major version, if available, has to be purchased. While updating the software, it's recommended to close all the running programs. Note that demo version of the software cannot be updated.

### To update Stellar Repair for Exchange:

- Click **Update Wizard** icon from **Tools Ribbon**.
- Update Wizard window opens. Click **Next**. The wizard will search for latest updates, and if it finds any new updates, a window will pop up indicating its availability.
- Click Next and the software will download the files from the update server. When the process is complete, the software will upgrade to the latest version.

### Live Update may not happen due to following reasons:

- Internet connection failure
- Updates are not available
- Unable to download configuration files
- Unable to locate updated files or version
- Unable to locate executable file

**Note:** If a major version is available, you need to purchase the software in order to upgrade it.

### **3. Working with the Software**

- 3.1. Select and Scan EDB Files
- 3.2. Preview Scanned Files
- 3.3. Save and Load Scan Info
- 3.4. Save Scanned Files
  - 3.4.1. Export Mailbox to Live Exchange Server
    - 3.4.1.1. How to Create Mailbox?
  - 3.4.2. Export Mailbox to Office 365
  - 3.4.3. Export Mailbox to PST
  - 3.4.4. Export Mailbox to Public Folder
  - 3.4.5. Export Mailbox to Other Formats
- 3.5. Search and Save Scanned Files
- 3.6. View Log Report

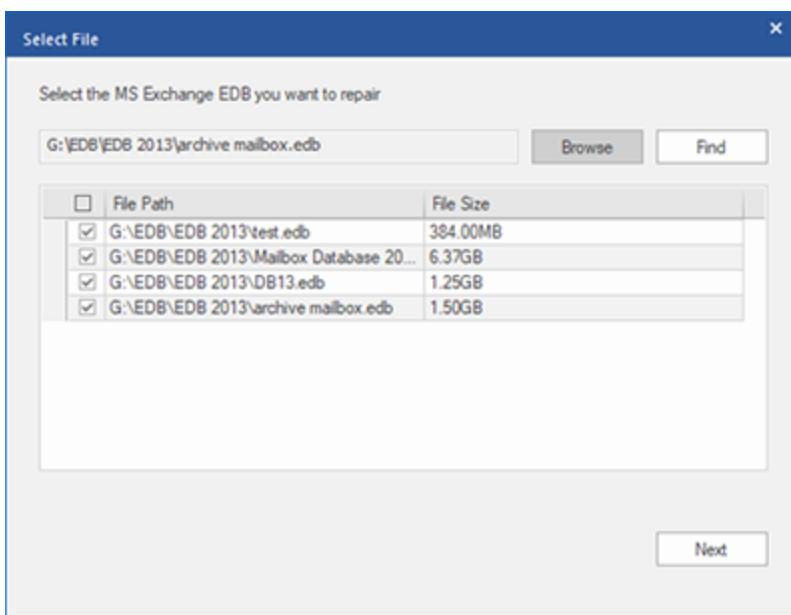

### 3.1. Select and Scan EDB Files

**Stellar Repair for Exchange** provides option to either add the EDB files directly from your hard drive or search for EDB files from a particular folder or drive, in case you don't know its exact location. After adding of searching the EDB files, you can scan up to four EDB files using the software.

There are two ways to scan the files depending upon the level of corruption to your EDB files. You can select either **Quick Scan** or **Extensive Scan**. See Scanning of EDB files, to know more.

#### To Browse and add EDB Files:

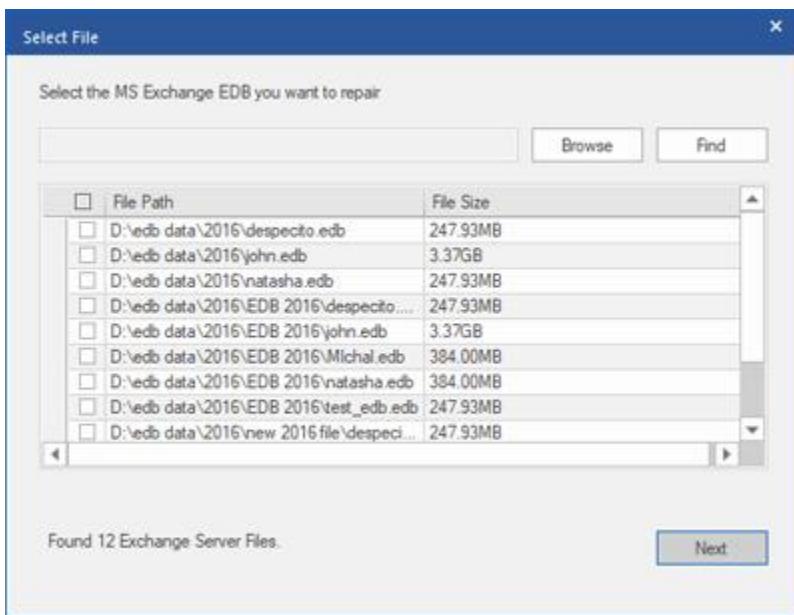

- Click **Select EDB File** from **Home Ribbon**. **Select File** dialog box opens.
- Click **Browse** to select the EDB files that you want to repair.

**Stellar Repair for Exchange** also allows you to find the EDB files in your computer's hard drive, in case you don't know their location.

#### To search and add EDB Files:

- Click **Find** in **Select File** dialog box. **Browse for Folder** dialog box opens.
- After the search is complete, list of EDB files found in the selected drive / folder is shown in **Select File** dialog box as shown below:

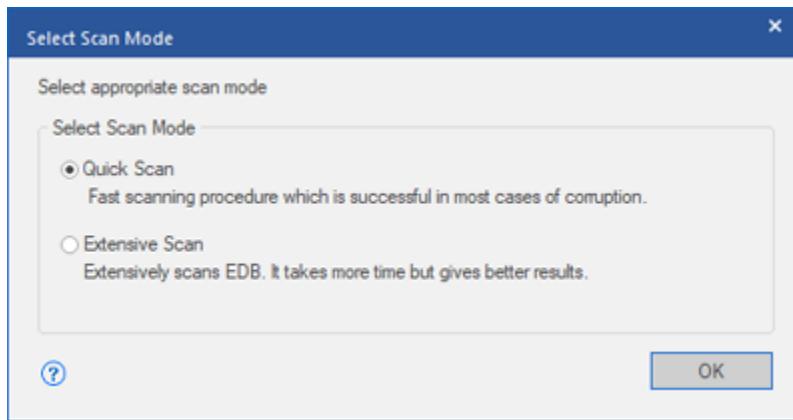

- Select the file you want to repair from this list and click **Next**.

**Note:** Maximum of 4 files can be scanned at a time using both options - **Find** and **Browse**.

## Scanning of EDB Files:

- After selecting the EDB files that you want to repair, click **Next**. **Select Scan Mode** dialog box opens.

- If you want to quickly scan the corrupt EDB file, select **Quick Scan**, which is a fast mode to scan and repair corrupt EDB file. Or, If you want to scan the corrupt EDB file deeply for the better results, select **Extensive Scan**. Click **OK** to start the scanning process.

**Tip:** **Quick Scan** takes less time in scanning process and provides a standard scan of your EDB files. Use this mode if you are scanning the EDB files for the first time. After scanning, preview the results and if you are not satisfied with the **Quick Scan** mode, then you can try **Extensive Scan** mode. Extensive Scan mode of scanning an EDB file is slow but more effective process. This mode is more powerful than Quick Scan mode. It is able to repair even highly corrupted EDB files.

- Once scanning is complete, you can preview the data of the scanned file.

## 3.2. Preview Scanned Information

Once EDB files are scanned, you will find a navigation tree on the left side showing the files with its mailboxes, folders and sub-folders. Select the desired mailbox/folder/sub-folder from this pane to view its data.

Preview of the mailbox data is available in a three pane structure: Left pane, Middle pane and Right pane which are explained in details below:

The screenshot shows the Stellar Repair for Exchange software interface. The top menu bar includes Home, View, Tools, Calendar, Activation, Help, and Buy Now. Below the menu is a toolbar with icons for Select EDB File, Save, Find Message, Scan, Load Scan, and Scan Info. The main window is divided into three panes: a left navigation pane, a middle list pane, and a right preview pane.

**Left Navigation Pane:** Shows a tree view of mailbox items under 'teresa william'. Nodes include Cabinet, Calendar, Contacts, Conversation Action!, Deleted Items, Documents, Drafts, Inbox, Journal, Junk E-Mail, New Folder, Notes, Outbox, Quick Step Settings, Restriction, and RSS Feeds. A status bar at the bottom left says 'Items: 62'.

**Middle List Pane:** Displays a table of scanned mailbox items. Columns are From, To, Subject, and Date. Rows show various email entries with details like recipient, subject, date, and content type (e.g., Rich Text Mail, Plain Text, HTML Format). An example row is highlighted.

| From                 | To                                 | Subject                             | Date                |
|----------------------|------------------------------------|-------------------------------------|---------------------|

**Right Preview Pane:** Shows detailed information for the selected email item. It includes fields for From, To, Subject, Date, and Attachments. It also displays a preview of the message content and links to the 'About the author' section.

- The left pane provides the navigation tree, displaying the files with its mailboxes, folders and sub-folders. Select the desired mailbox/folder/sub-folder from this pane.
- The middle pane provides a list of mailbox items, in a tabular format, of the selected mailbox/folder/sub-folder.

The pane contains the following columns:

- Attachments:** Shows an attachment icon if the particular mail item contains an attachment.
- Deleted Mailbox :** Shows a deleted icon if the particular mail item was deleted from the mailbox.
- From:** Shows the e-mail address of the sender.
- To:** Shows the e-mail address of the receiver.
- Subject:** Shows the e-mail subject.
- Sent Date:** Shows the date and time when the e-mail was sent.

**Tip:** You can change the order of the above given columns as per your requirement. Click and hold on the column name and drag the column to the desired location to change it.

- The right pane provides the preview of the mail item that you select from the middle pane. It shows the following information:
  - From:** Shows the e-mail address of the sender.
  - To:** Shows the e-mail address of the receiver.
  - Subject:** Shows the subject of the e-mail.
  - Date:** Shows the date and time when the e-mail was sent.
  - Attachments:** Shows the attachments of the selected mailbox item.
  - Body:** Shows the preview of body of the selected mail item.

#### *Additional Options:*

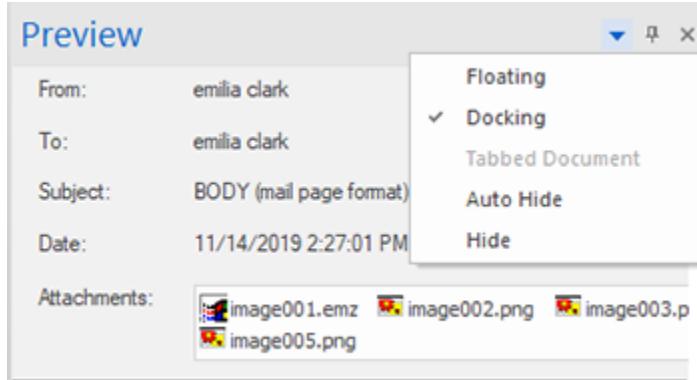

- Quick search:** The software provides quick search options for Mails and Media files. In the middle pane below the table headings, type the keywords in the search bar of a particular column. The columns that support quick search are From, To, Subject, and Date.

|   | From            | To                               | Subject                               | Date                |

- **Preview mail options:**

The preview pane provides the following preview options:

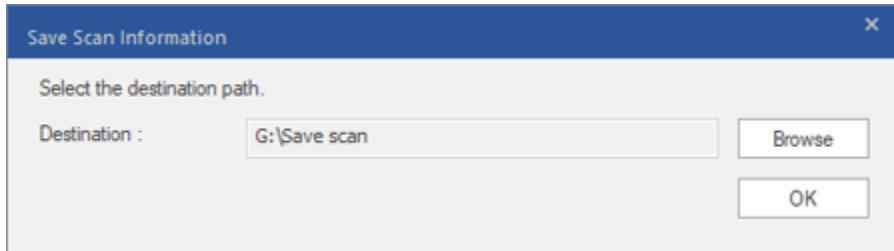

- **Floating/Docking Preview Pane:** The preview pane opens in **Docking** view as default. To change the view to **Floating**, click on and select **Floating** from the drop down menu. To change the view back to **Docking**, click and hold the floating window from its title bar. The screen provides dock hints that indicate a valid drop location when you are dragging the float window. When the preview pane is about to be docked, a dock preview will be displayed to show where the preview pane will be placed.
- **Pin/Unpin Preview Pane:** Click on to pin and to unpin the preview pane. Alternatively, click on select **Auto Hide** to pin/unpin the pane. When unpinned, the preview pane automatically hides on the right side of the work area. Hover the mouse on **Preview** button to view the preview pane.
- **Close/Hide the Preview Pane:** To close the preview pane, click on close located at right hand top corner of the pane. Alternatively, click on and select **Hide** from the drop down menu.

### 3.3. Save and Load Scan Info

With **Stellar Repair for Exchange**, you can save the scan information of the repaired files, in case you need to access it at a later stage.

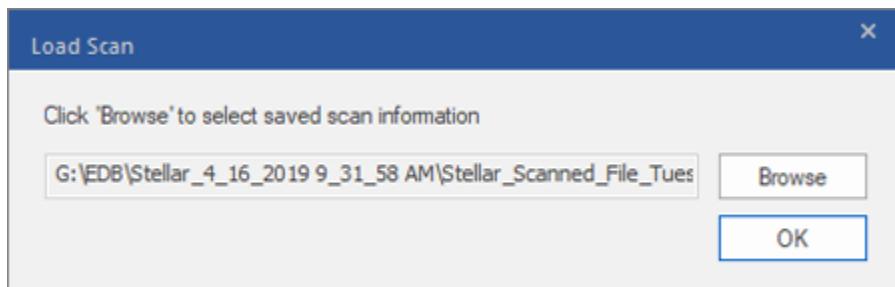

#### To save the scan info:

- From **Home Ribbon**, select **Save Scan**. **Save Scan Information** dialog box displays.
- Click **Browse** to select the destination where you want to save the scan info. Click **OK**.

#### To load the scan info:

- From **Home Ribbon**, select **Load Scan**. **Load Scan** dialog box displays.
- Click **Browse** to select the location of the .img file from which you want to load the scan info. Click **OK**.

## **3.4. Save Scanned Files**

**Repaired files can be exported/ saved to various formats.**

3.4.1. Export Mailbox to Live Exchange Server

    3.4.1.1. How to Create Mailbox?

3.4.2. Export Mailbox to Office 365

3.4.3. Save Mailbox in PST Format

3.4.4. Export Mailbox to Public Folder

3.4.5. Save Mailbox in MSG, EML, RTF, PDF or HTML

### 3.4.1. Export Mailbox to Live Exchange Server

**Stellar Repair for Exchange** allows you to export your repaired mailboxes to the mailbox of a mounted database on a Live Exchange Server. If your Exchange database is not mounted on the Live Exchange Server then perform a **Dial Tone Recovery** process to mount the database.

See Dial Tone Recovery, to know how to perform the **Dial Tone Recovery** process.

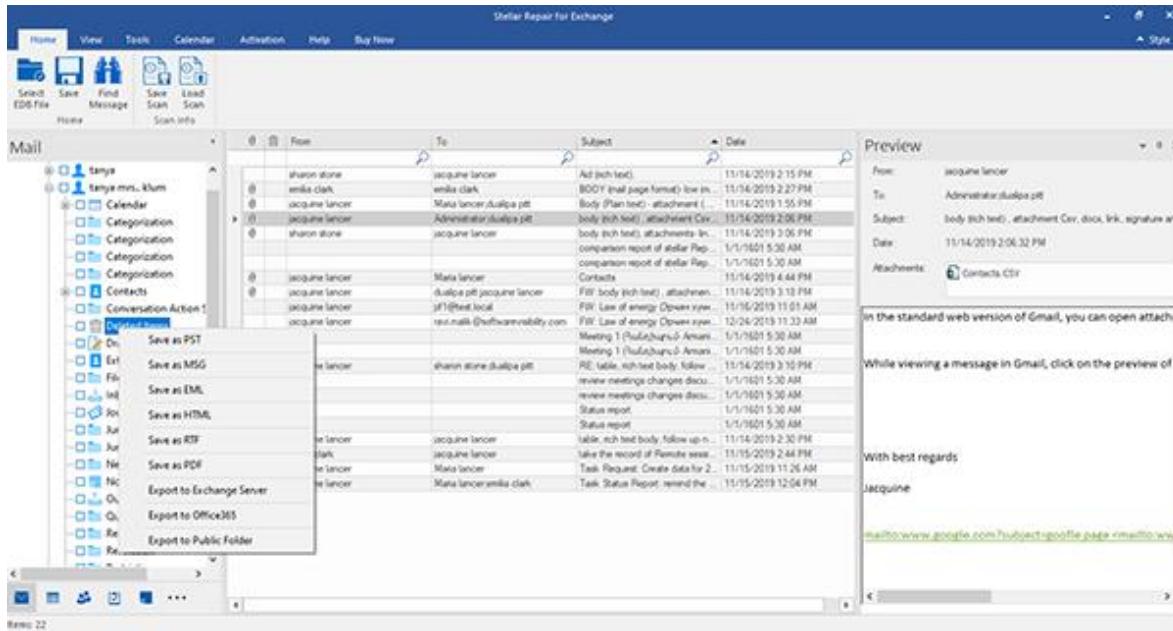

To know how to export data to a Live Exchange Server refer to the topics as follows:

1. Export Single Mailbox to Exchange Server
2. Export Multiple Mailboxes to Exchange Server

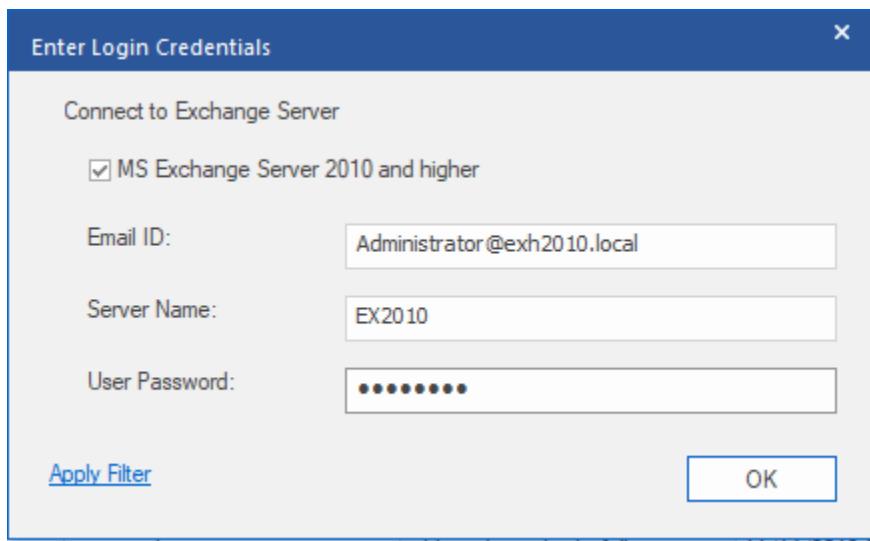

#### To Export Single Mailbox to Exchange Server:

1. Right Click on the mailbox or mailbox item in the navigation tree that you want to export and select **Export to Exchange Server**.

**Note:** In order to export data by right clicking on the mailbox, the local system should be in the domain of the Exchange server on which you are exporting the data.

2. Enter Login Credentials dialog box opens, enter the **Mailbox Name** and **Server Name**.

**Note:** By default, the **MS Exchange Server 2010 and higher** check-box is unchecked. If you are using Exchange Server 2010 or a higher version, check the **MS Exchange Server 2010 and higher** check-box.

3. If you want to filter the scanned results before exporting, click on the **Apply Filter**.

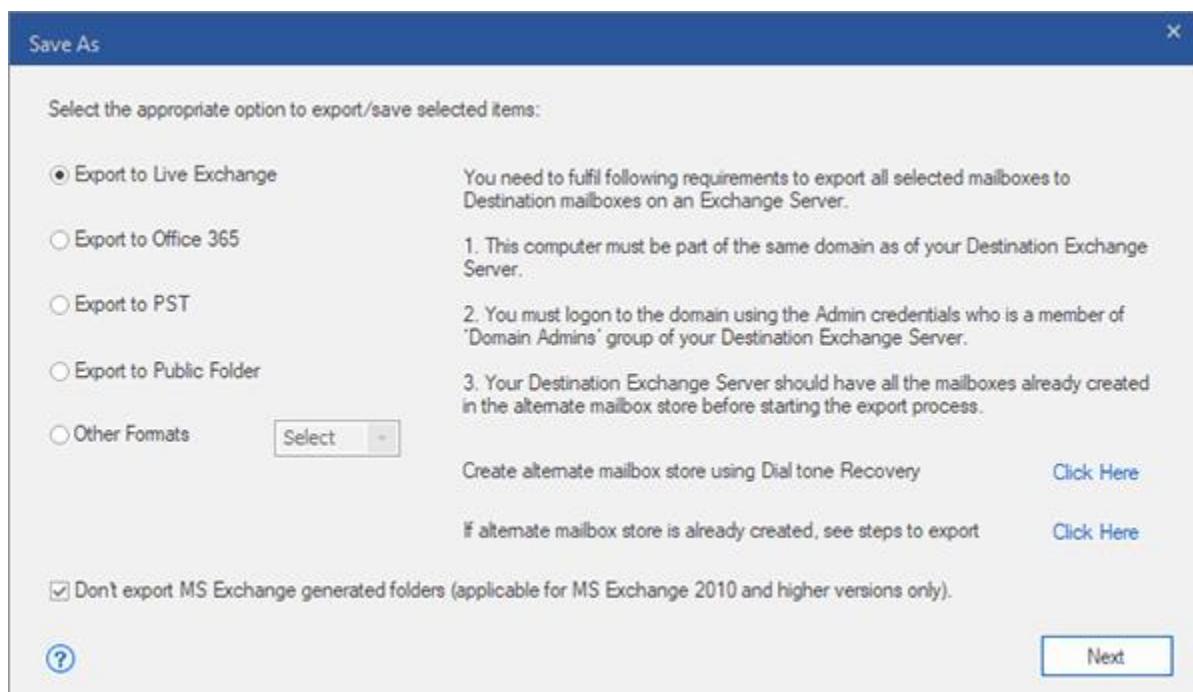

4. Click **OK**.

## To Export Multiple Mailboxes to Exchange Server:

1. Select the mailboxes or mailbox items that you want to export from the navigation tree.

2. Click **Save** button from the **Home Ribbon**. A **Save As** dialog box opens.

3. Select **Export to Live Exchange** from the list of options on the **Save As** dialog box.

**Note:** By default, the **Don't export MS Exchange generated folders** check-box is checked. If you want to export the system folders, Uncheck the **Don't export MS Exchange generated folders** checkbox. This option is only applicable for scanned EDB files of **MS Exchange 2010** and **higher** versions.

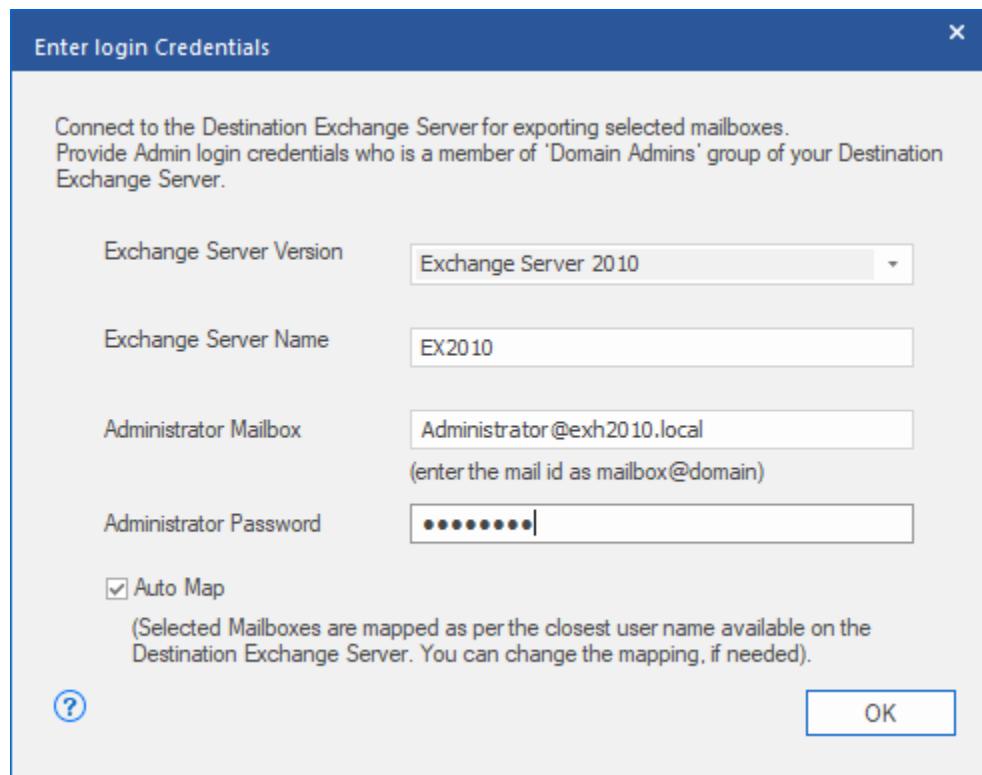

4. Click **Next** to proceed.

5. A **Enter Login Credentials** dialog box opens

6. The dialog box requires the following fields:

- **Server Version:** Select the Exchange Server version from the drop-down ribbon.
- **Server Name:** Enter the name of the Exchange Server.
- **Admin Mailbox:** Enter the administrator email id for the Exchange Server.
- **Password:** Enter the password of the administrator login id of the Exchange Server.

Click **OK** to continue.

7. If exchange server is not able to find Active Directory Server (ADS), a **Save** dialog box shows that the server is not operational. Click **OK**.

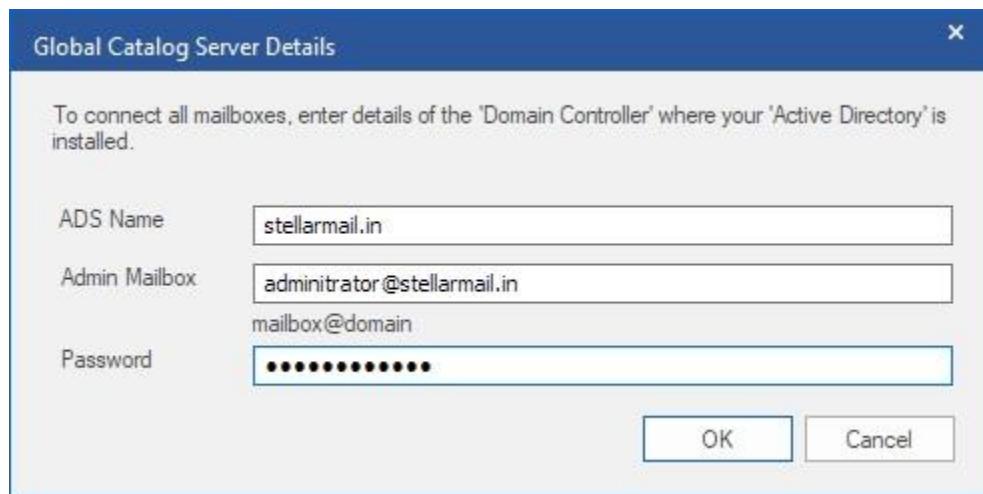

A **Global Catalog Server Details** dialog box opens. To connect all the mailboxes, enter details of the '**Domain Controller**' where your '**Active directory**' is installed.

**Fill in the required fields :**

- **ADS Name :** Enter the ADS name.

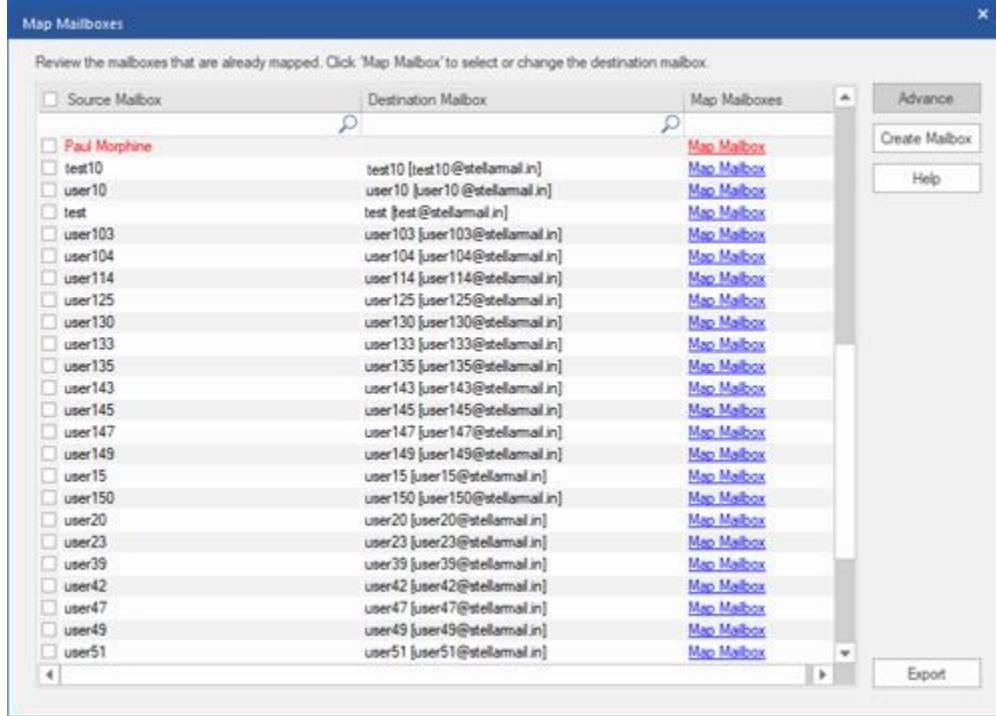

- **Admin Mailbox** : Enter the administrator email id for the Exchange Server.
- **Password** : Enter the password of the administrator login id of the Exchange Server.

Click **OK**

8. **Map Mailboxes** dialog box opens displaying mapped and unmapped mailboxes. The dialog box consists of the following options:

- **Source Mailbox:** Source Mailbox provides a list of scanned mailboxes from the repaired EDB file. You can search for a specific mailbox to be mapped to a particular destination mailbox.
- **Destination Mailbox:** Destination Mailbox provides a list of scanned mailboxes on the Exchange Server. You can search for a specific mailbox that has been auto-mapped to a particular source mailbox.
- **Advance:** Click Advance to filter the scanned results before saving.
- **Create Mailbox:** This option allows you to create a new mailbox to map any user. To know the steps to create a new user, click [here](#).
- Click "**Map Mailbox**" in the dialog box to select/ change the destination mailbox.

Check/ Uncheck the desired user mailbox and click **Export** button to start exporting the data.

**Note:**

- Check the **Auto Map** checkbox if you want mapping to be done automatically. To map the mailboxes manually, uncheck the **Auto Map** checkbox. **Auto Map** automatically maps the source mailbox to destination mailbox, if found on the destination server with the same name.
- Click on **Map Mailbox** to select/ change the destination mailbox in **Map Mailbox** dialog box.
- The server version selected while logging to Live Exchange Server should be similar to that of the system on domain.
- Mailboxes in blue are mapped mailbox and mailboxes in red are unmapped.

9. The mapped and unmapped source EDB mailboxes are listed.

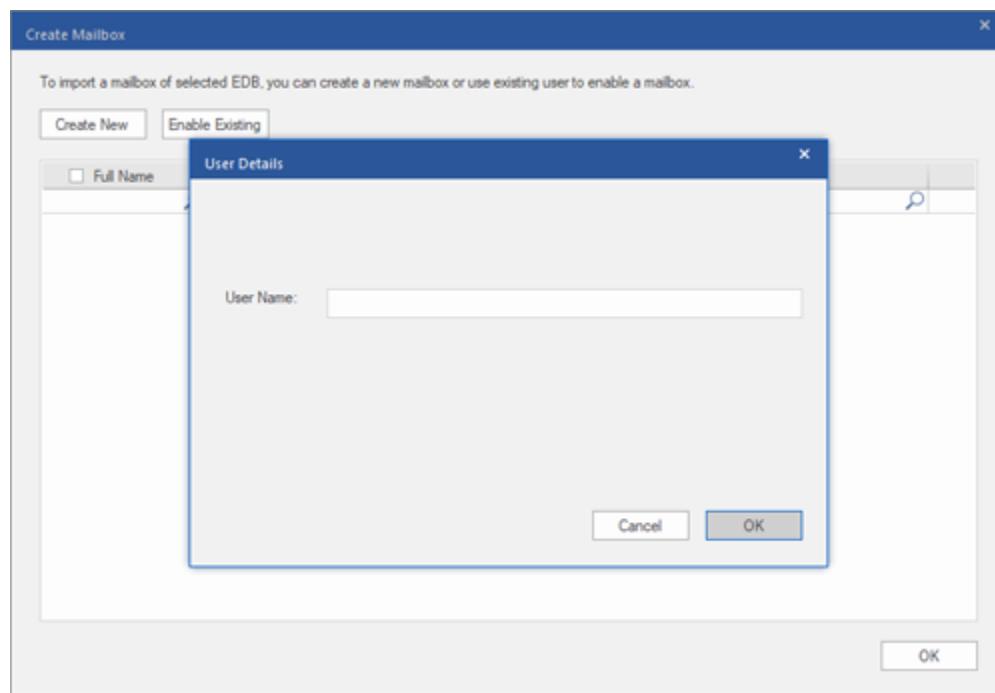

**Note:** Full-Mailbox permissions are mandatory for the user to whom the data is being exported.

### 3.4.1.1. How to Create Mailbox?

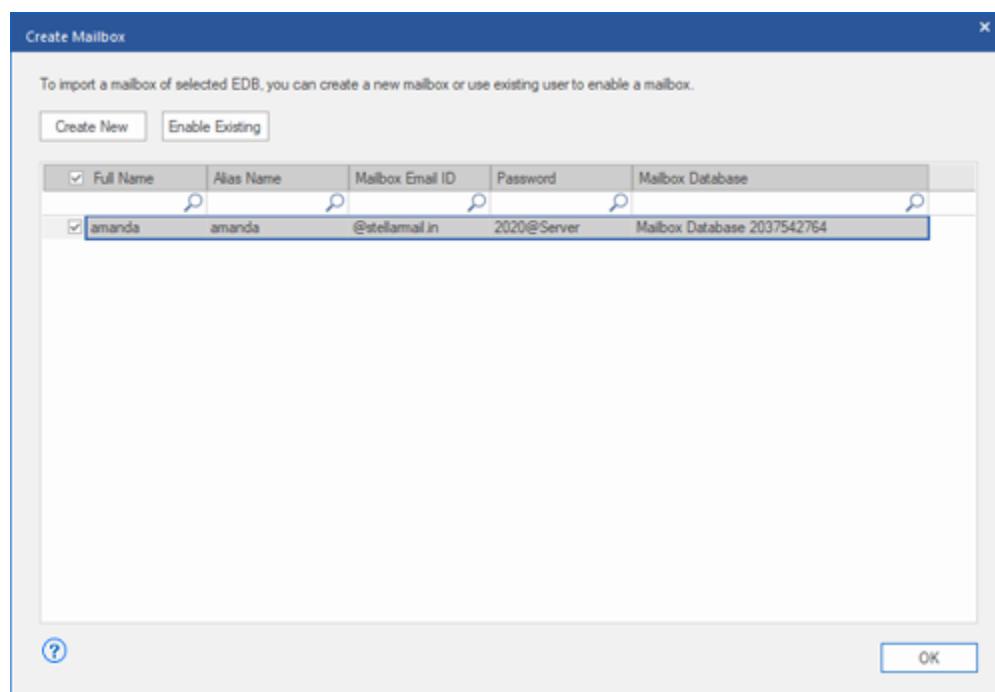

1. Click **Create Mailbox** from the **Map Mailboxes** dialog box, to create a new mailbox for mapping.

**Note:** To know how to open **Map Mailboxes** dialog box, refer **Export Multiple Mailboxes to Exchange Server Steps 1 to 8.**

2. Click **Create New**. Enter the **User Name** to be created. Click **OK**.

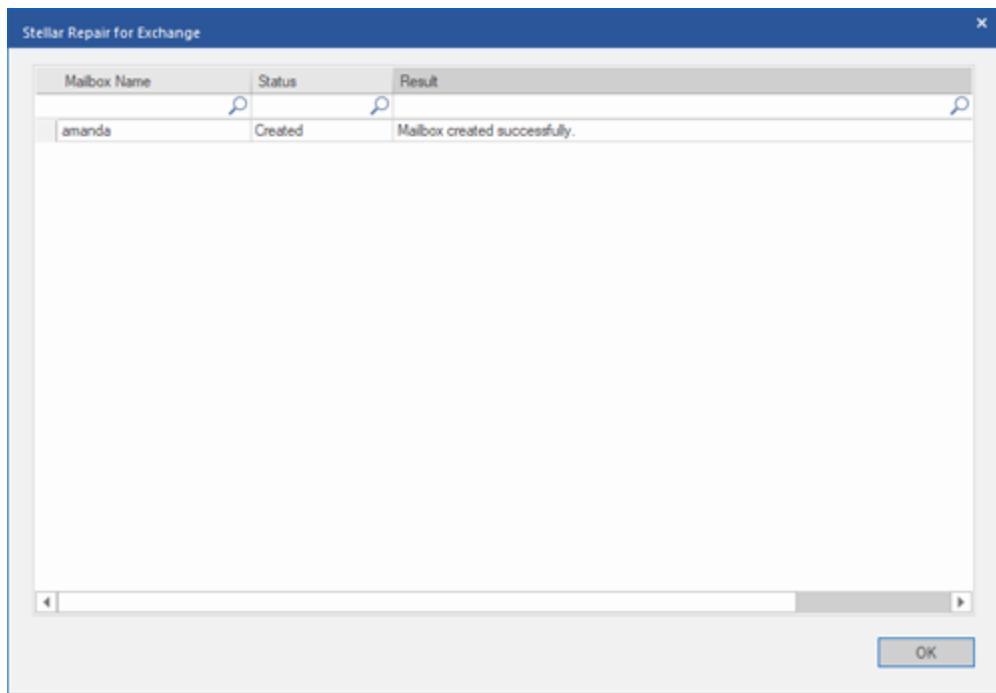

3. Select the desired users to be created. Click **OK**.

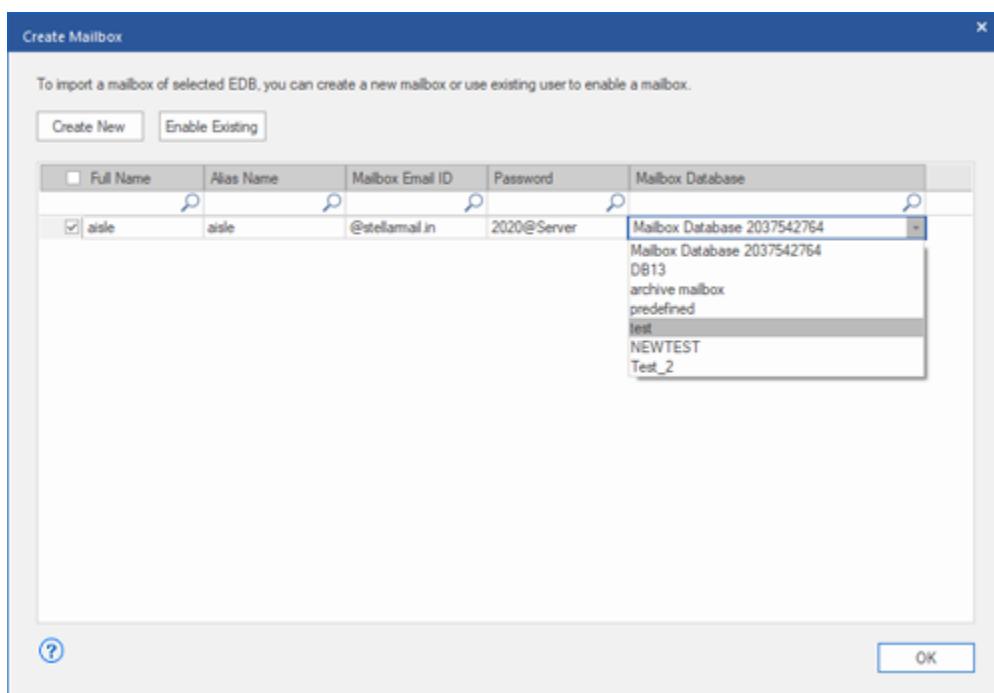

**Note:** In order to export data, the user should have the full data access rights.

4. The user's mailbox will be created successfully. Click **OK**.

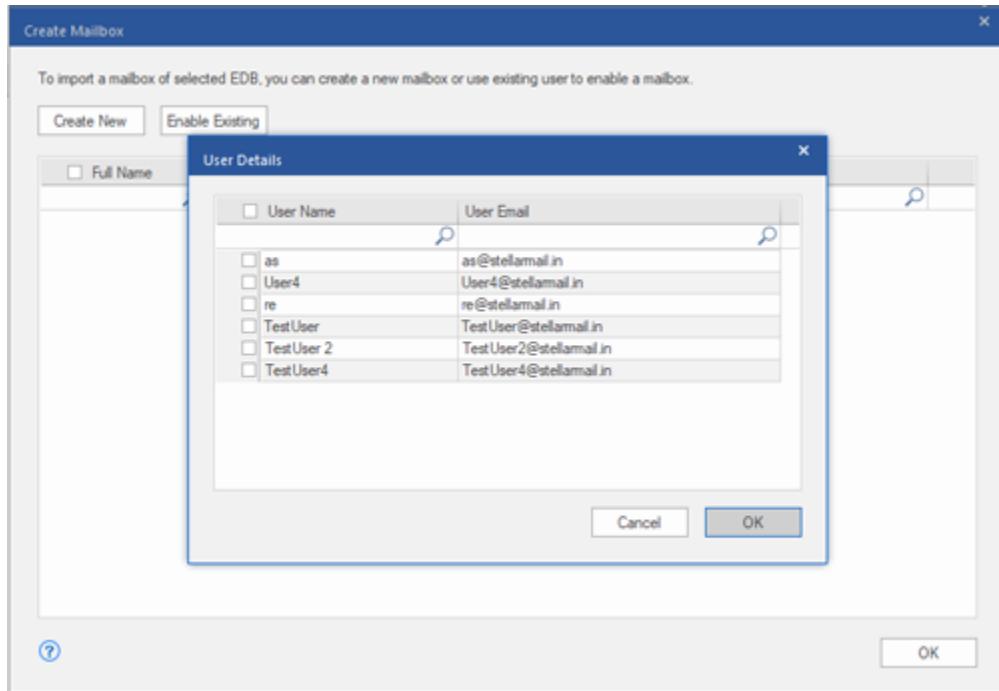

**Note:**

- The fields that can be edited are : Full Name, Alias Name, Password, and Mailbox Database.

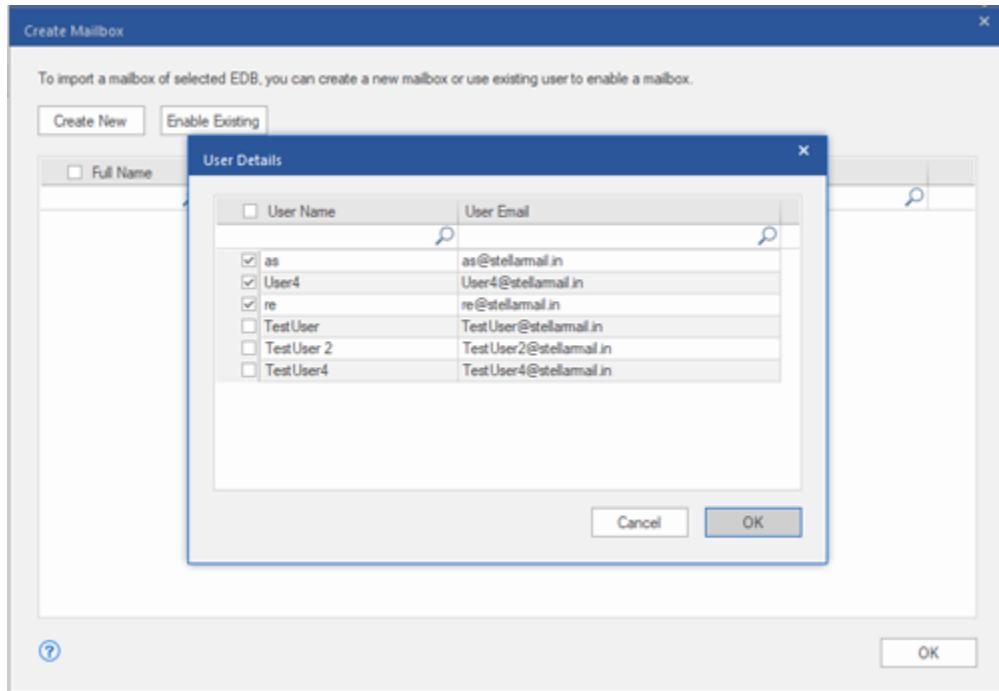

- The fields that can not be edited are : Mailbox Domain.

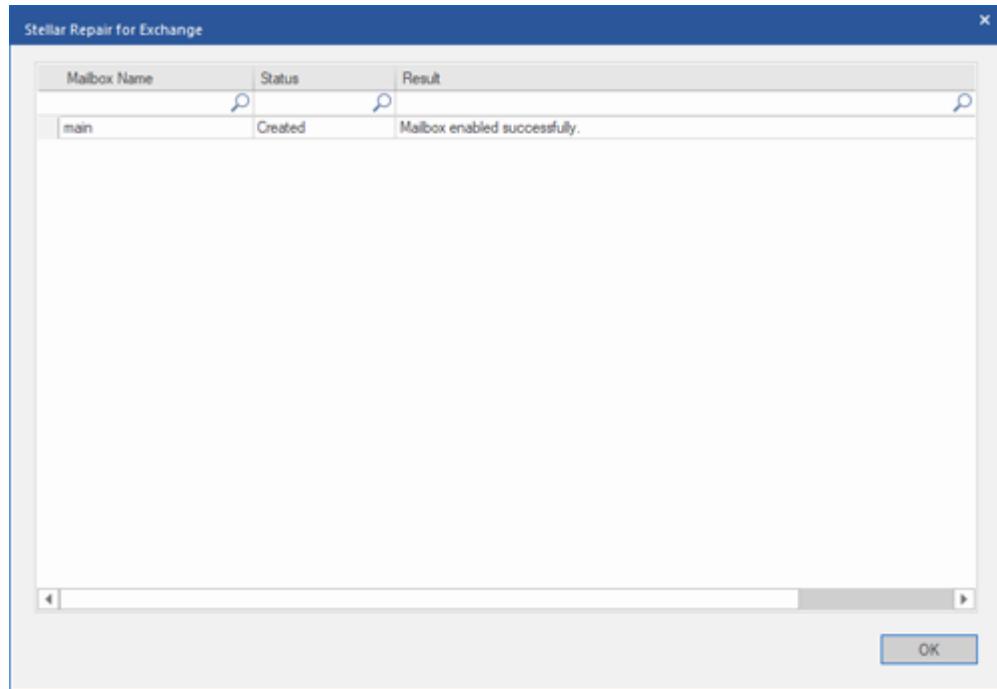

4. In order to enable the user's mailbox, click **Enable Existing**. Disabled users will be listed.

5. Check the users you want to enable again. Click **OK**.

6. Confirm the checked users and click **OK**. The selected users mailbox will be enabled successfully. Click **OK**.

**Note:**

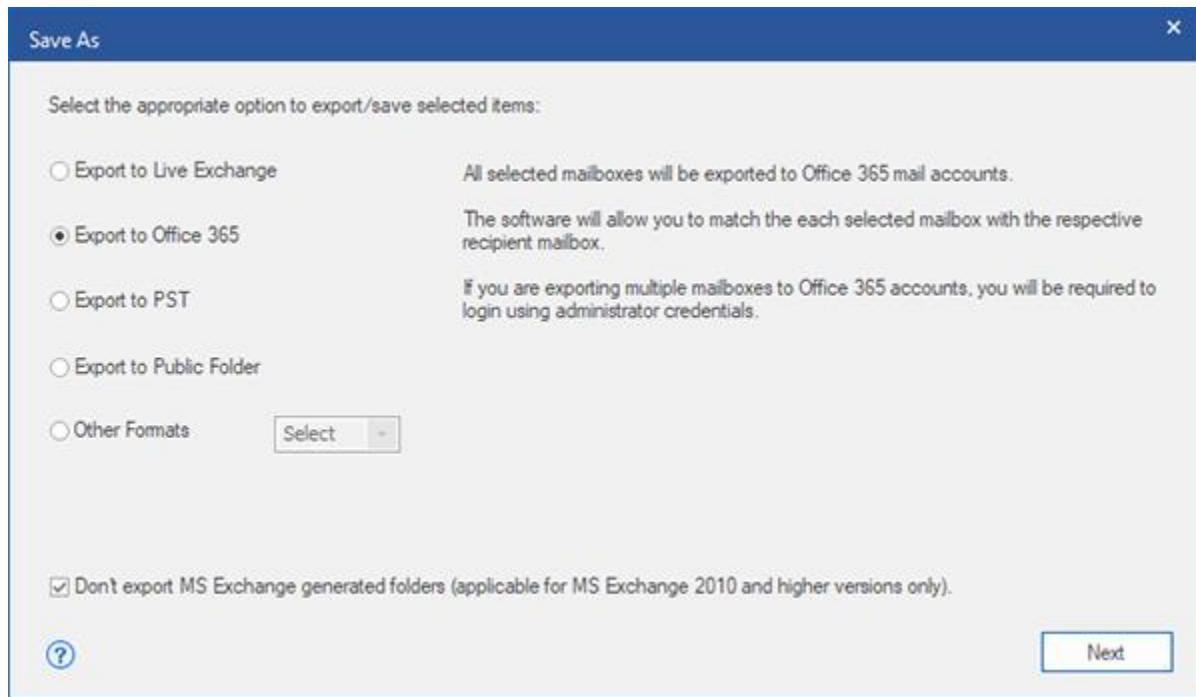

- **Enable Existing** is to be used when a specific user has been disabled before.
- In case of enabling an Existing mailbox only the Mailbox Database field can be changed (you can change the destination Mailbox Database) of the mailbox.

### 3.4.2. Export Mailbox to Office 365

**Stellar Repair for Exchange** allows you to export your repaired mailboxes to **Office 365** mail accounts. The software provides a mapping feature that ensures the source mailbox is exported to the correct destination mailbox.

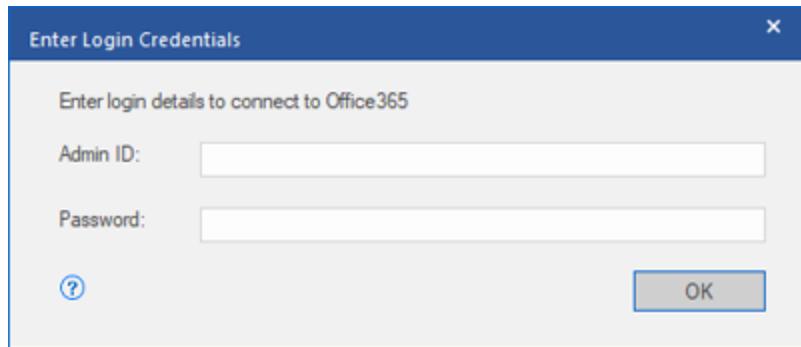

#### To export mails to Office 365:

1. Select the items from the scanned **EDB** file which you want to export.
2. Click **Save** icon in **Home Ribbon**. A **Save As** dialog box opens.
3. Select **Export to Office 365** from the list of options on the **Save As** dialog box.

**Note:** By default, the **Don't export MS Exchange generated folders** check-box is checked. If you want to export the system folders, Uncheck the **Don't export MS Exchange generated folders** checkbox. This option is only applicable for scanned EDB files of **MS Exchange 2010 and higher** versions.

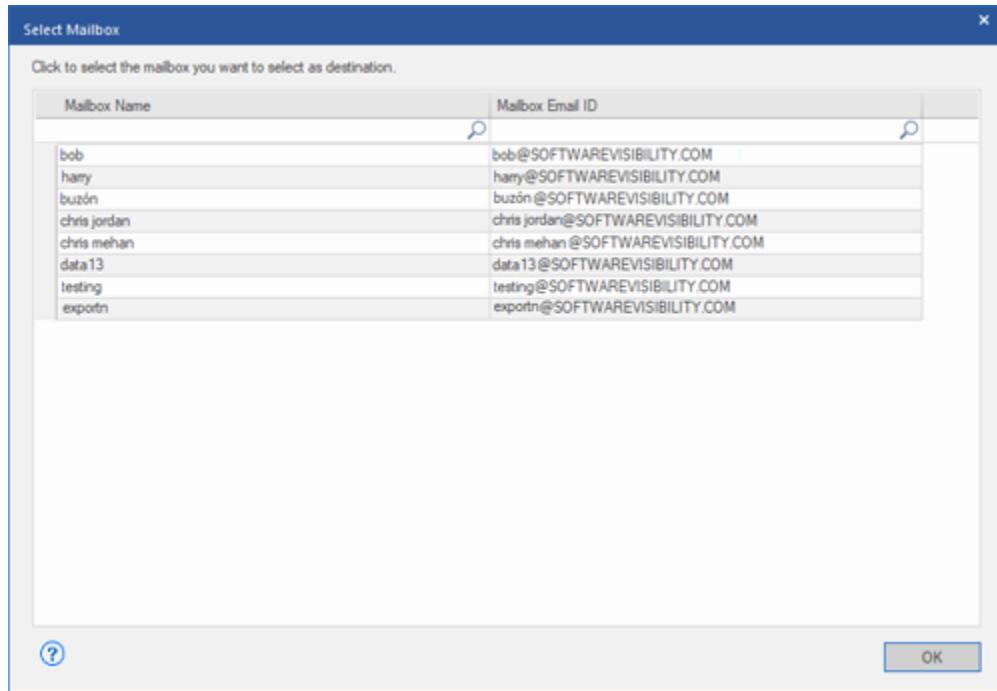

4. Click **Next** to proceed.
5. Enter **Login Credentials** dialog box opens; enter **Admin ID** (user having administrative rights) and **Password**. Click **OK** to continue.

6. The mapped and unmapped source EDB mailboxes are listed.

A screenshot of the "Map Mailboxes" dialog box. It shows a list of source mailboxes from an EDB file and their corresponding destination mailboxes in Office 365. The list includes entries like "anna116" and "Chris" under "Source Mailbox" and their respective Office 365 email addresses under "Destination Mailbox". There are also many entries for "HealthMailbox-Stpmail" and "In-Place Archive" mailboxes. To the right of each entry is a "Map Mailbox" button. A search bar and an "Advance" button are at the top right, and an "Export" button is at the bottom right.

7. In order to manually map the mailbox or change the mapped mailbox, click on **Map Mailbox**. The screen displays all the Office 365 mailbox ID's that can be mapped.

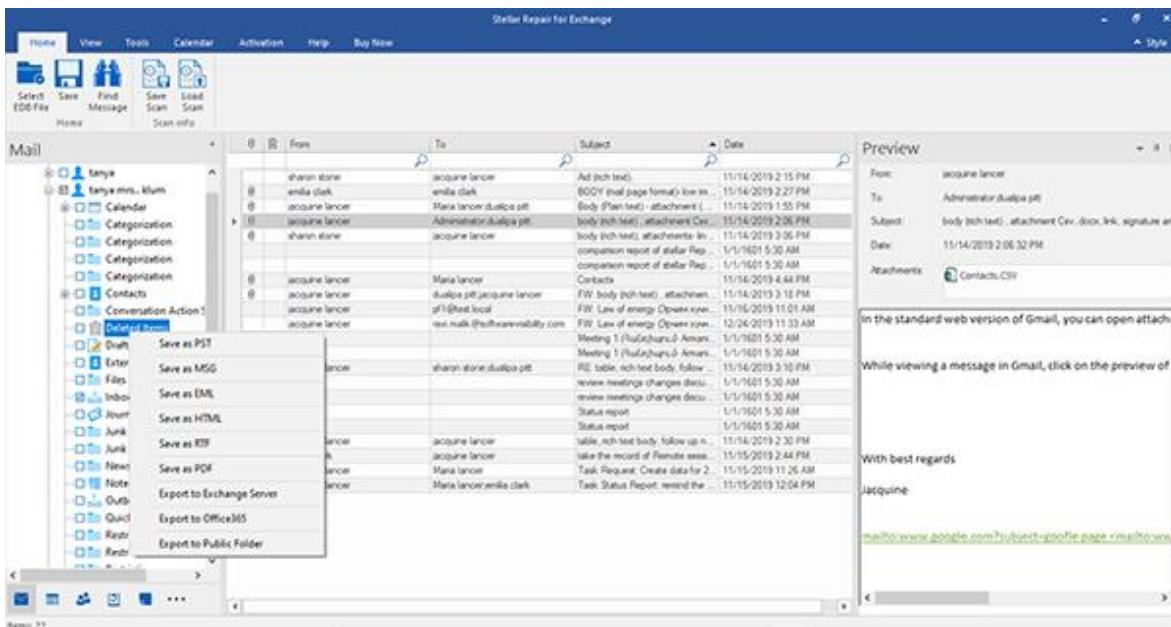

8. If you want to filter the scanned results before exporting, click on **Apply Filter**.

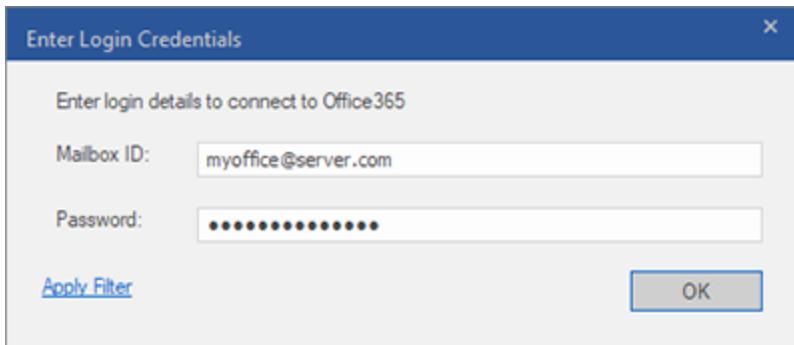

9. Click **OK** to continue.

**In Stellar Repair for Exchange, you can also export individual mailbox from the navigation tree using the steps given below:**

- Right click on the mailbox or mailbox item that you want to export from the navigation tree.
- Select **Export to Office365** to save the mailbox in Office 365.

- Enter **Login Credentials** dialog box opens; enter **Mailbox ID** (user having administrative rights) and **Password**.

- If you want to filter the scanned results before exporting, click on **Advance**.
- Click **OK** to continue.

**Note:**

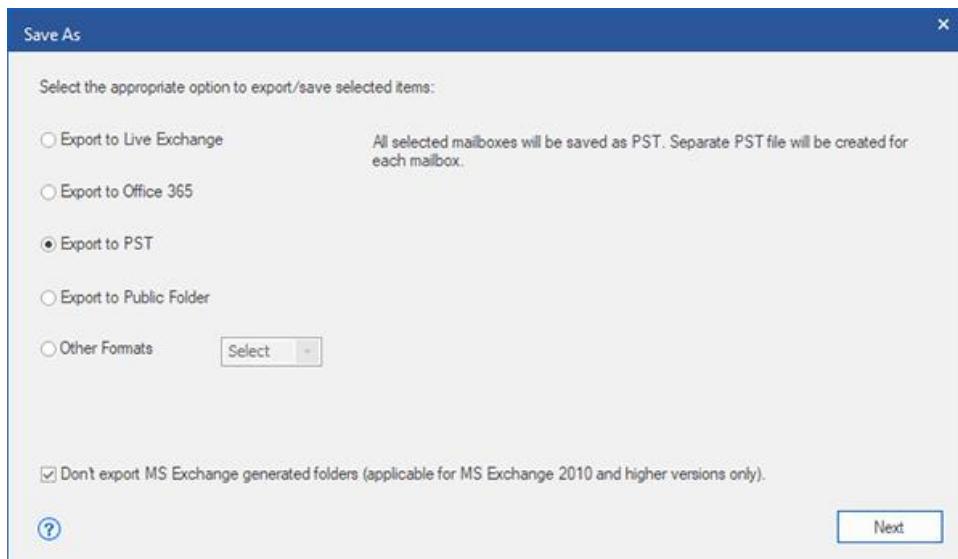

- You need to have a Microsoft Office 365 user account for exporting data to Office 365.
- To save mailbox data in Office 365 you need to install Office 2013 or Office 2010 with service pack2.
- For Domain systems, you cannot export offline data to Office 365.
- After mapping, the list displays the Office 365 E-Mail IDs, of the same domain that was used while logging.

### 3.4.3. Save Mailbox in PST Format

**Stellar Repair for Exchange** allows you to save the repaired files in PST format. PST is the most common format to import your mailbox data in **Microsoft Outlook**.

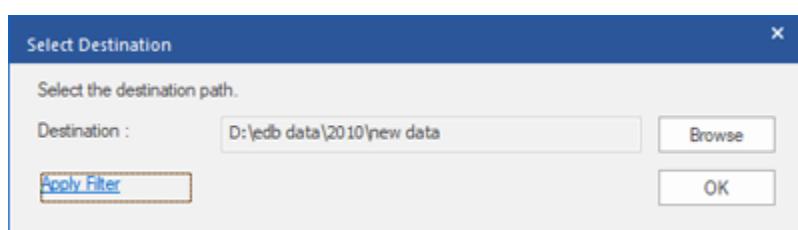

#### To save the repaired files in PST:

1. Select the mailboxes or mailbox items that you want to export from the navigation tree.
2. Click **Save** from **Home Ribbon**. A **Save As** dialog box opens.
3. Select **Export to PST** from the list of options on the **Save As** dialog box.

**Note:** By default, the **Don't export MS Exchange generated folders** check-box is checked. If you want to export the MS Exchange generated folders, Uncheck the **Don't export MS Exchange generated folders** checkbox. This option is only applicable for scanned EDB files of **MS Exchange 2010 and higher** versions.

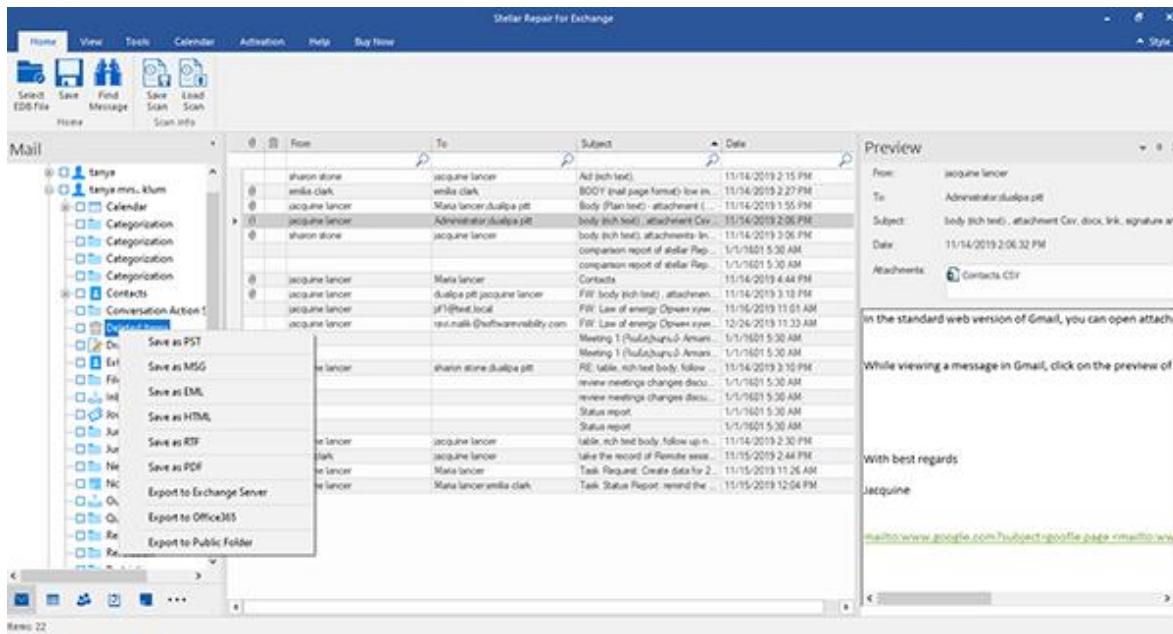

4. Click **Next** to proceed.
5. Browse the destination in the **Select Destination** dialog box where you want to save the file.

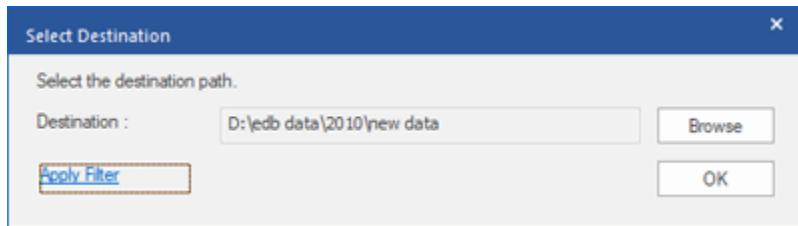

6. If you want to filter the scanned results before saving, click on **Apply Filter**.
7. Click **OK** to continue.

In Stellar Repair for Exchange, you can also export individual mailbox from the navigation tree using the steps given below:

- Right click on the mailbox or mailbox item that you want to export from the navigation tree.
- Select **Save as PST** to save the mailbox in PST format.

- Browse the destination in the **Select Destination** dialog box where you want to save the file.
- If you want to filter the scanned results before saving, click on **Apply Filter**.

- Click **OK** to continue.

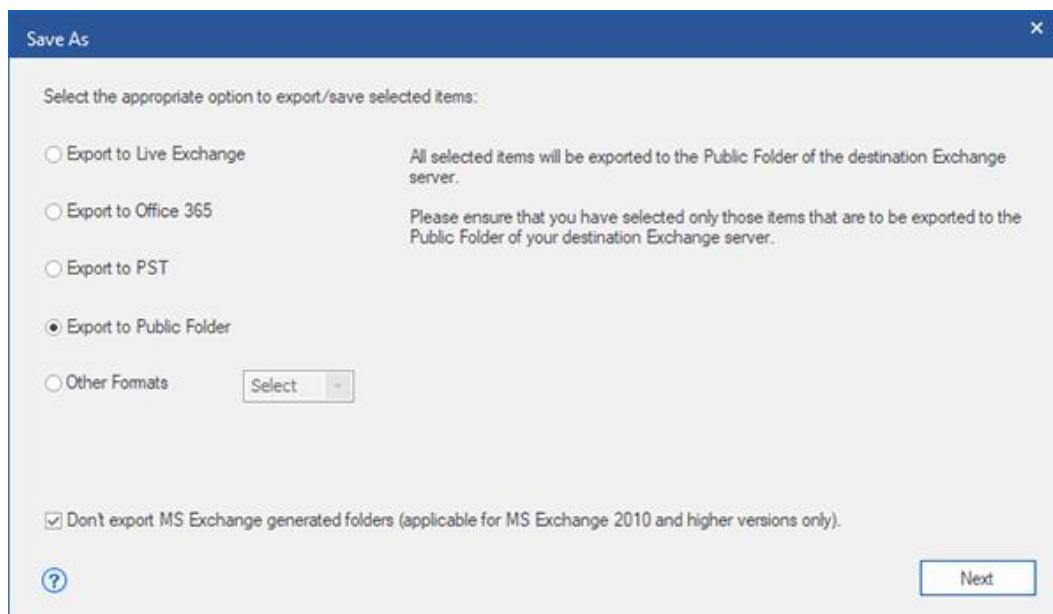

Once you save the repaired mailbox in **PST** format, you can import the **PST** file in **MS Outlook**. See Importing PST file in MS Outlook, to know how to import PST file.

### 3.4.4. Export Mailbox to Public Folder

**Stellar Repair for Exchange** allows you to export the repaired mailboxes or mailbox items to the **Public Folder** of **Exchange Server** and **Office 365 account**. **Public Folder** is one of the feature within **Microsoft Exchange** and **Office 365** which gives users access to common folders for sharing information. To export the mailbox to the **Public Folder**, you must have full access to the Public Folder root for the **Exchange Server** and **Office 365 account** where you want to export the data.

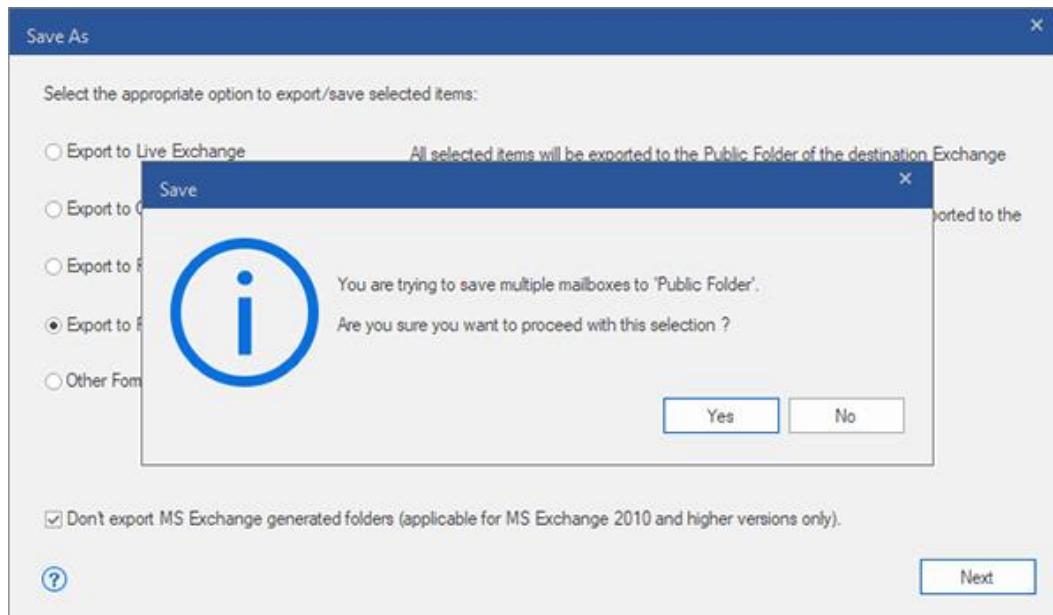

#### To export mails to Public Folder:

1. Select the mailboxes or mailbox items that you want to export from the navigation tree.
2. Click **Save** from Home Ribbon. A **Save As** dialog box opens.
3. Select **Export to Public Folder** from the list of options on the **Save As** dialog box.

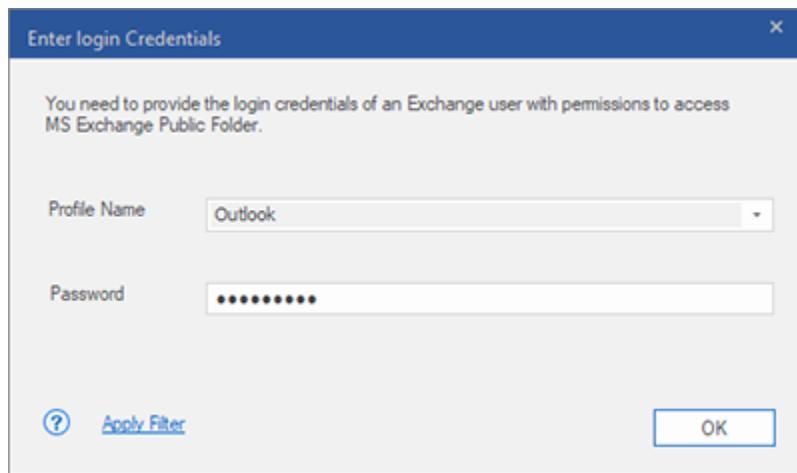

**Note:** By default, the **Don't export MS Exchange generated folders** check-box is checked. If you want to export the system folders, Uncheck the **Don't export MS Exchange generated folders** checkbox. This option is only applicable for scanned EDB files of **MS Exchange 2010 and higher** versions.

4. Click **Next** to proceed.
5. A **Save** dialog box opens to confirm your action, select **Yes** to confirm. **Enter Login Credentials** dialog box appears.

6. Select the **Outlook Profile** ( Exchange user profile or Office 365 user profile) from **Profile Name** drop down list and enter the **Password**.

7. If you want to filter the scanned results before exporting, click on **Apply Filter**.

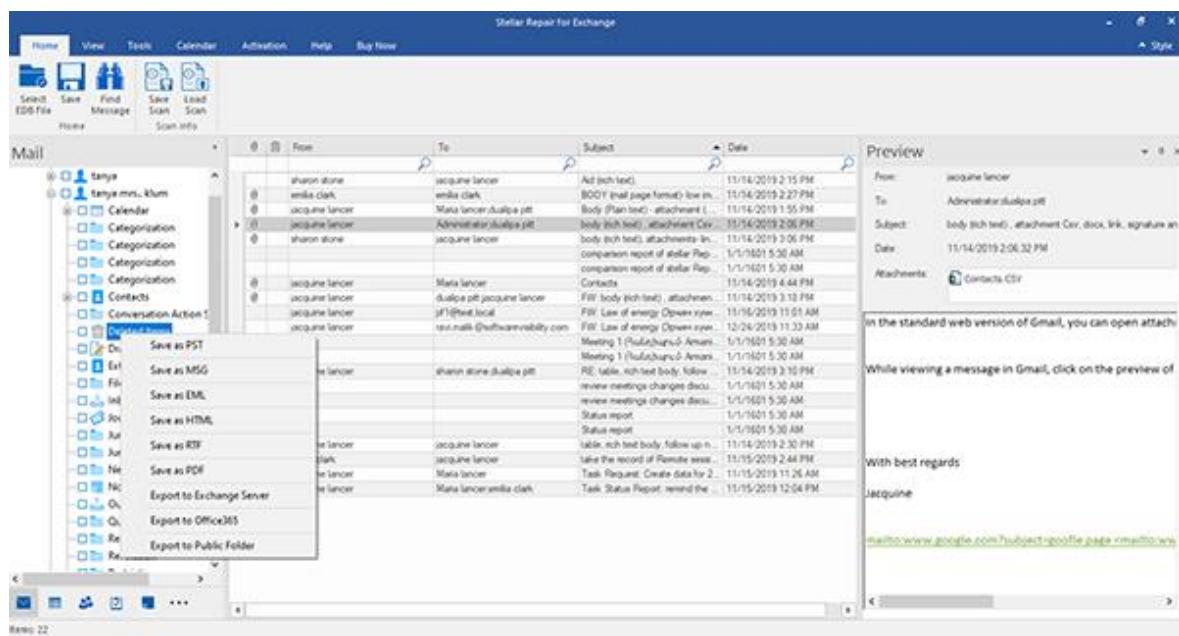

8. Click **OK** to continue.

**Note :**

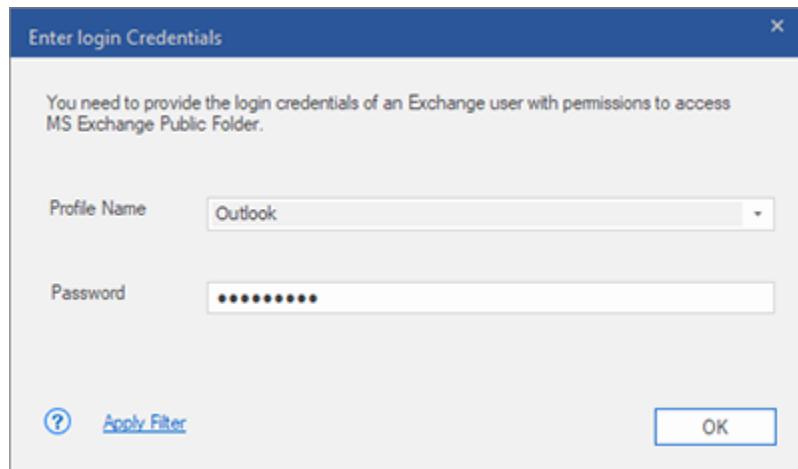

- You must have configured the **Live Exchange Server** and **Office 365** user of the Administration Server to export the data to **Public Folder**.
- You must have full-mailbox permissions and full access to the **Public Folder root** for exporting the data to **Public Folder**.

In Stellar Repair for Exchange, you can also export individual mailbox from the navigation tree using the steps given below:

- Right click on the mailbox or mailbox item that you want to export from the navigation tree.
- Select **Export to Public Folder** to export the mailbox to Public Folder of Exchange server.

- Enter **Login Credentials** dialog box appears. Select the **Outlook Profile (Exchange user profile or Office 365 user profile)** from **Profile Name** drop down list and enter the **Password**.

- If you want to filter the scanned results before exporting, click on **Apply Filter**.
- Click **OK** to continue.

#### **Note :**

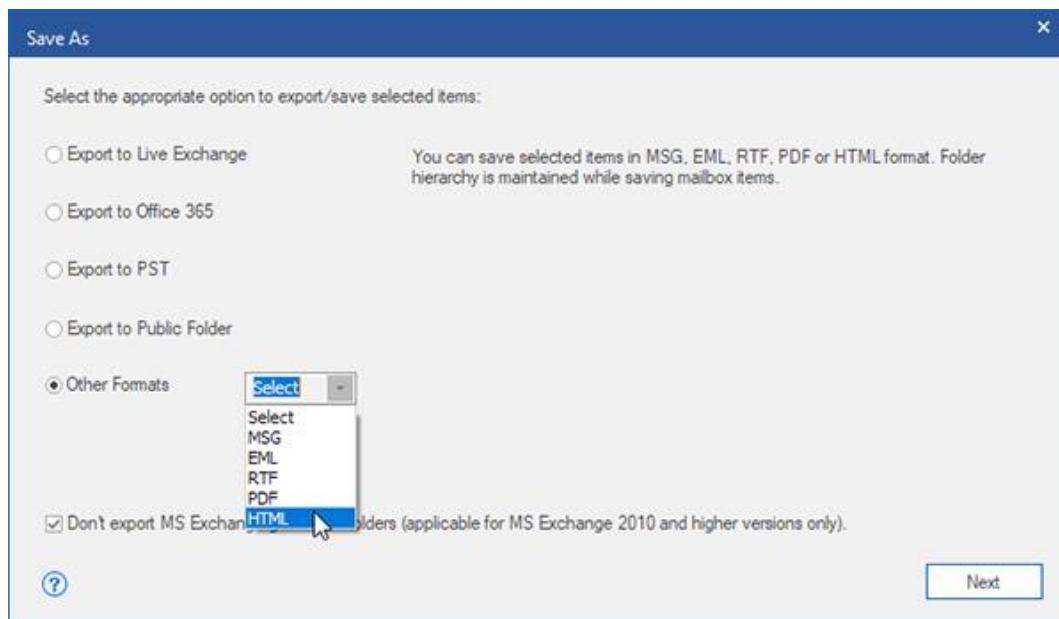

- You must have configured the **Live Exchange Server** and **Office 365** user of the Administration Server to export the data to **Public Folder**.
- You must have full-mailbox permissions and full access to the **Public Folder root** for exporting the data to **Public Folder**.

### 3.4.5. Save Mailbox in MSG, EML, RTF, PDF or HTML

Stellar Repair for Exchange allows you to save the repaired files in various formats like MSG, EML, RTF, PDF and HTML. These formats are especially helpful to users to save individual mails. While saving the complete mailboxes or folders in MSG, EML, RTF, PDF and HTML formats, folder hierarchy is maintained by **Stellar Repair for Exchange**.

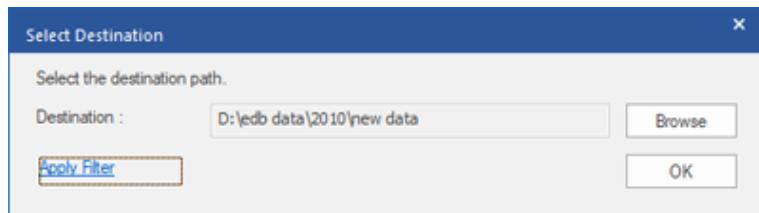

#### To save the repaired files in MSG, EML, RTF, PDF or HTML:

1. Select the mailboxes or mailbox items that you want to export from the navigation tree.
2. Click **Save** from Home Ribbon. A **Save As** dialog box opens.
3. Click **Other Formats** and select the desired format from the **drop-down** list by clicking on the drop-down list box.

**Note:** By default, the **Don't export MS Exchange generated folders** check-box is checked. If you want to export the system folders, Uncheck the **Don't export MS Exchange generated folders** checkbox. This option is only applicable for scanned EDB files of **MS Exchange 2010 and higher** versions.

4. Click **Next** to proceed.
5. Browse the destination in the **Select Destination** dialog box where you want to save the file.

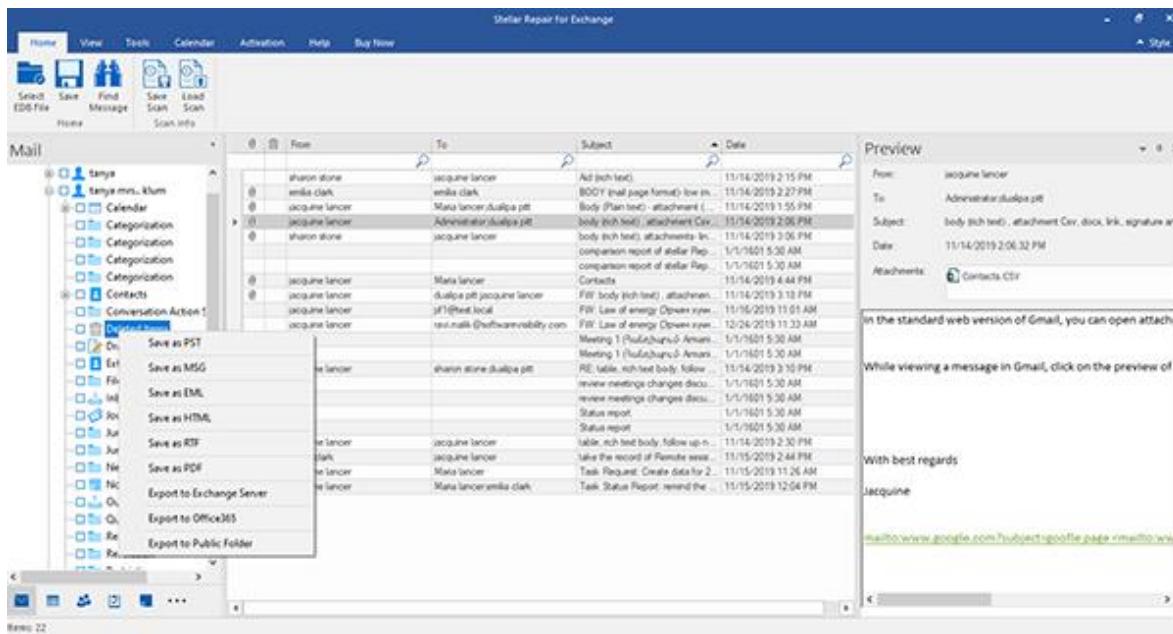

6. If you want to filter the scanned results before saving, click on **Apply Filter**.
7. Click **OK** to continue.

Using **Stellar Repair for Exchange**, you can save individual mailboxes in either of the given formats.

To save mailboxes or mailbox item individually from the tree in the left pane, simply right-click on it and:

- Select **Save as MSG** to save the mailbox in MSG format.
- Select **Save as EML** to save the mailbox in EML format.
- Select **Save as HTML** to save the mailbox in HTML format. (Attachments cannot be saved, however, their names are visible)
- Select **Save as RTF** to save the mailbox in RTF format. (Attachments cannot be saved, however, their names are visible)
- Select **Save as PDF** to save the mailbox in PDF format. (CC of the mails is not shown and attachments cannot be saved, however, their names are visible)

**Note:** You can also right click on a particular mail to save it individually in MSG, EML, HTML, RTF, and PDF format from the middle pane.

If you look at the source of many HTML documents (including HTML emails), you are likely to find some text that explains which version of HTML was used by the author. Versions of HTML are defined by the W3C, and therefore HTML documents contain a reference to the W3C, for example:

```
<!DOCTYPE HTML PUBLIC "-//IETF//DTD HTML 4.0 Transitional//EN"  
"http://www.w3.org/TR/REC-  
HTML401loose.dtd">#MAILTO:RECIPIENT  
Your  
text here
```

## 3.5. Search and Save Scanned Files

**Stellar Repair for Exchange** allows you to perform the search operation for the scanned mailbox. Search results can be saved in **PST, MSG, EML, HTML, RTF** and **PDF** formats.

The search operation displays the results as per the criteria specified. The search results are displayed depending on **Any Criteria** or **Exact Match**. You can switch between the view tabs depending on the requirement:

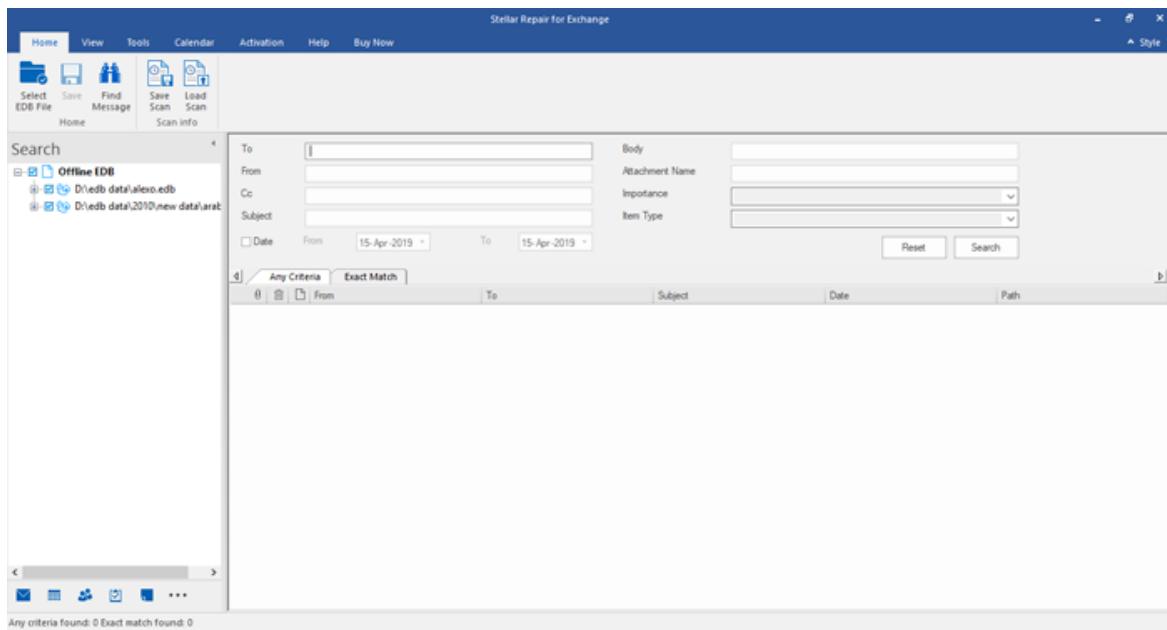

- **Any Criteria** : Displays the results which closely matches to your searching criteria.
- **Exact Match** : Displays the results which exactly matches to your searching criteria.

There are two different ways to search for the specific results of the scanned mailbox:

- Click on **Find Message** button in the **Home** ribbon.
- Click on **Search** icon in the preview tabs.

The fields that refine the search results are:

- **To** : This filter displays all the mails that have been sent to the e-mail id entered.
- **From** : This filter displays all the mails that have been received from the e-mail id entered.
- **Cc** : This filter displays all the mails that have been marked as cc to the e-mail id entered.
- **Subject** : This filter displays all the mails with the entered subject heading.
- **Body** : This filter displays all the mails with the entered mail body text.
- **Attachment Name** : This filter displays all the mails that have been sent/ received with the specific attachment name entered.
- **Importance** : This filter displays all the mails that have pre-defined priority level. Select the priority level from the drop-down.
- **Item Type** : This filter displays all the mails that have been read or unread. Select the type of the mail from the drop-down.
- **Date** : This filter allows user to specify a starting and ending date for which the user wants to include/ exclude the mails for saving/ exporting.

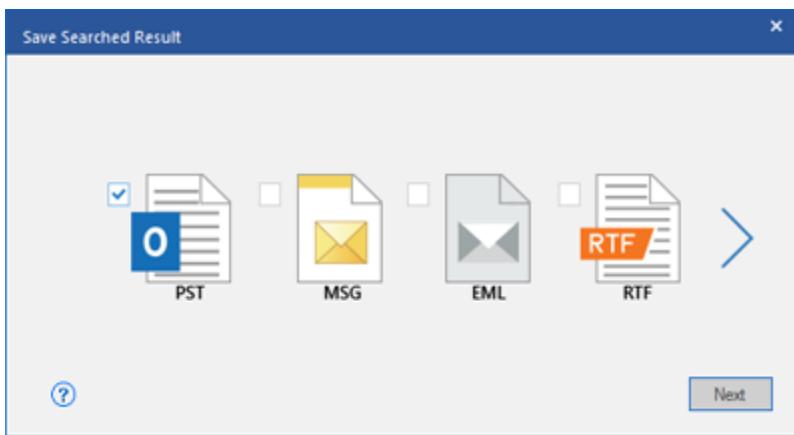

After entering the desired criteria, click **Search**. To reset the criteria, click **Reset**.

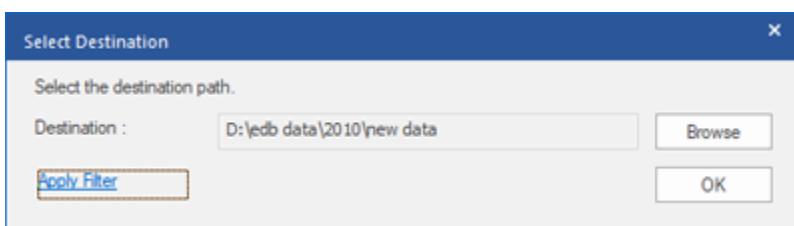

**Note:** Data of the currently selected view tab is saved.

#### To save search results:

- Click **Save** from **Home Ribbon**.
- Select the required format from **Save Search Results dialog box** and click **Next**.

- Browse the destination in the **Select Destination** dialog box where you want to save the file.

- If you want to filter the scanned results before saving, click on **Apply Filter**.
- Click **OK** to continue.

**Note:**

- *After search is complete, you can right click on messages to save them individually.*
- *Close Microsoft Outlook, if open, to save the mailboxes.*

## 3.6. View Log Report

With **Stellar Repair for Exchange**, you can view the **Log Report** to analyze the repairing process.

**To view the log report:**

- Click on **View** Ribbon and select **Log Report**.

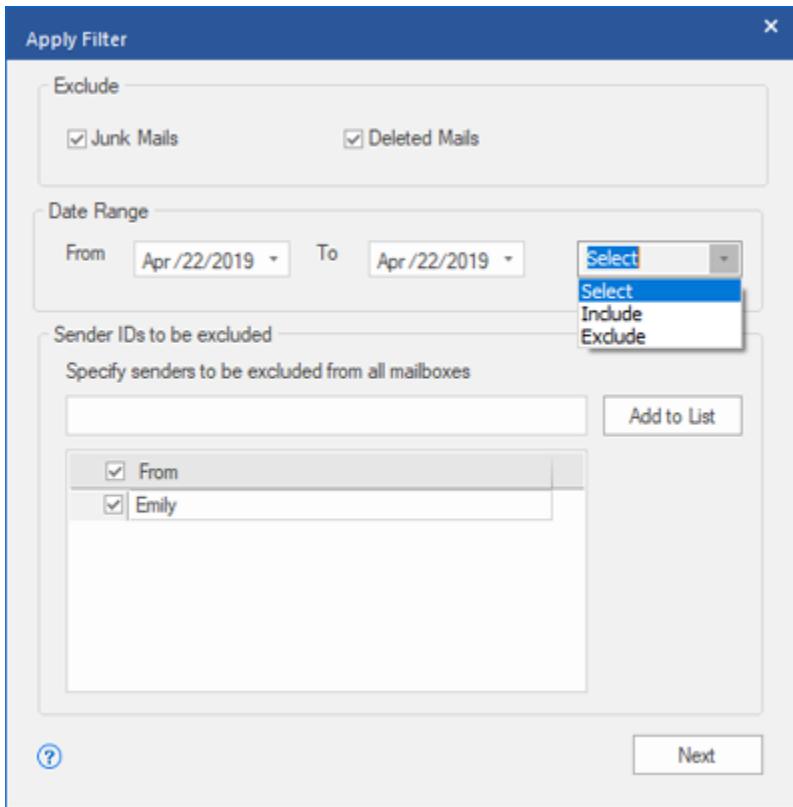

The **Log Report** provides the following information:

- **File Path:** Shows the location of the file.
- **Start Time:** Shows the start time and date when scanning process was started.
- **File Size:** Shows the size of the EDB.
- **Scan Type:** Shows the type of scan (Quick or Extensive scan) that you selected for the scanning process.
- **End Time:** Shows the end time and date when the scanning process was completed.
- **Total Mailboxes:** Shows the total number of mailboxes with respective EDB file names.
- **Export Data Logs:** Shows detailed logs of data that was exported using the application.

# Apply Filter

**Apply Filter** option in the save dialog box enables the user to make the scanned results more precise. Choose the option if you want to filter the emails to be saved/ exported.

**Apply Filter** dialog box opens.

Stellar Repair for Exchange provides 3 filter options:

1. **Exclude:** This filter allows user to exclude mails from **Junk Mail Folder** and **Deleted Mail Folder**.
2. **Date Range:** This filter allows user to specify a starting and ending date for which the user wants to include/exclude the mails for saving/ exporting.
  - **Include:** Select **Include** from the drop-down menu to convert the mails for the specified range and exclude the rest.
  - **Exclude:** Select **Exclude** from the drop-down menu to exclude the mails for conversion for the specified range and include the rest.
3. **Sender IDs to be excluded:** This filter allows the user to exclude the mails from a list of specified senders. To exclude the mails, enter the complete E-mail addresses of the sender and click on **Add to List**. The mentioned E-mail addresses will be listed in the E-mail addresses list box. Click **Next**.

## Performing Dial Tone Recovery

**Dial Tone Recovery** is a process of using the **Dial Tone Portability** feature available in Microsoft Exchange Server. The feature provides an empty Exchange database (with the same database schema version) that allows users who had mailboxes on the failed and dismounted database to send and receive new emails.

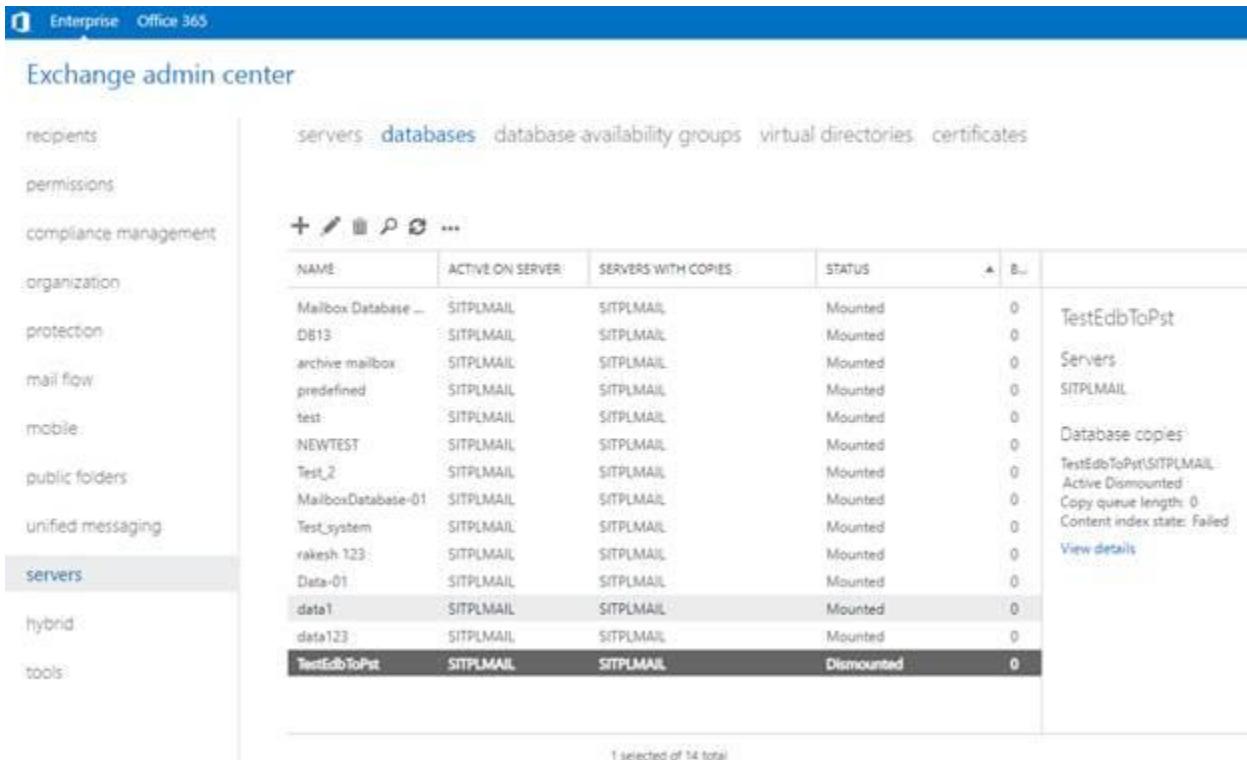

Steps to perform Dial Tone Recovery process:

Before you begin **Dial Tone Recovery**, ensure that the user having an account with Administrator Rights on mailboxes.

The entire process of Dial Tone Recovery involves two steps:

Step 1- Create an empty database on the mailbox server to replace the failed database. This empty database is known as the Dial Tone Database.

Step 2- Export all the mailboxes from the corrupt or dismounted database to the Dial Tone Database.

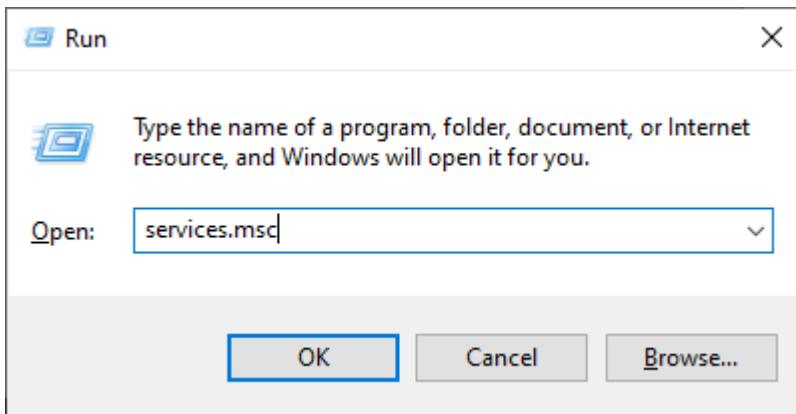

The screenshot shows the Exchange admin center interface. The top navigation bar includes links for Enterprise, Office 365, and various administrative categories like recipients, permissions, compliance management, organization, protection, mail flow, mobile, public folders, unified messaging, servers, hybrid, and tools. The 'servers' category is currently selected, indicated by a highlighted sidebar. Below the navigation, there's a toolbar with icons for creating (+), editing (pencil), deleting (trash), and other actions. The main content area displays a table of databases. The columns are: NAME, ACTIVE ON SERVER, SERVERS WITH COPIES, STATUS, and two small icons. The table lists several databases, including 'Mailbox Database ...', 'DB13', 'archive mailbox', 'predefined', 'test', 'NEWTEST', 'Test\_2', 'MailboxDatabase-01', 'Test\_system', 'rakesh\_123', 'Data-01', 'data1', and 'data123'. The 'Testedbtopst' database is highlighted with a dark background, showing its details: it is active on 'SITPLMAIL', has 'SITPLMAIL' as both the server and copy, and is currently 'Dismounted' with a status of '0'. A tooltip for this row indicates 'Testedbtopst(SITPLMAIL, Active Dismounted, Copy queue length: 0, Content index state: Failed)' and a 'View details' link.

| NAME                 | ACTIVE ON SERVER | SERVERS WITH COPIES | STATUS            |          |   |

Step 1- To Replace the failed database by a Dial Tone Database:

1. Log on **Exchange Server** with **Administrator Credentials**.
2. Press **Win+R**, type **Services.msc** and press '**Enter**' or click '**OK**'.

3. Stop these three services:

- Stop Microsoft Exchange Search Service
- Stop Microsoft Exchange Search Host Controller Service
- Stop Microsoft Exchange Information Store Service

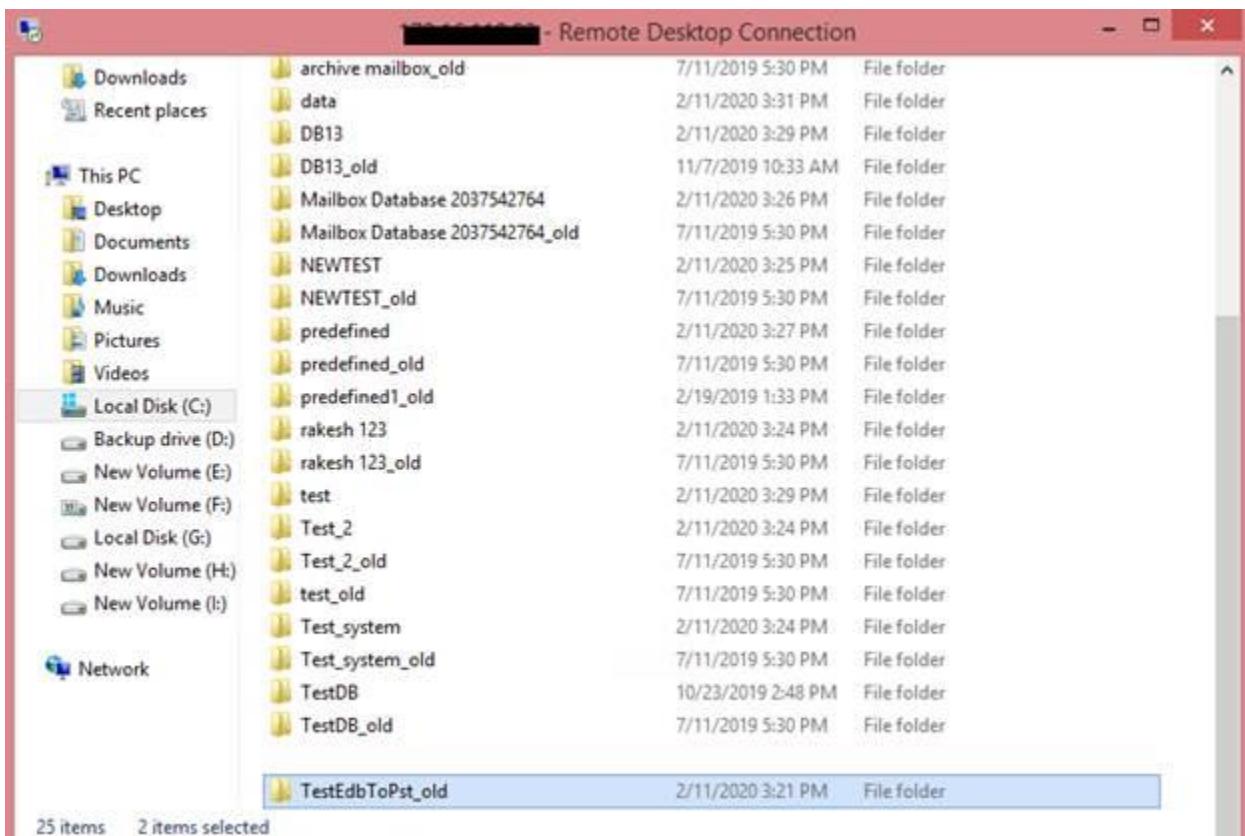

A screenshot of the Windows Services snap-in window titled 'Services - Remote Desktop Connection'. The window has a toolbar at the top with icons for File, Action, View, Help, and various navigation buttons. The main area is a table titled 'Services (Local)'. The columns are 'Name', 'Description', 'Status', and 'Start'. The 'Name' column lists various Microsoft Exchange services. The 'Status' column shows most services as 'Running' except for 'Microsoft Exchange Information Store' which is also listed as 'Running'. The 'Start' column shows all services as 'Auto'. A horizontal scroll bar is visible at the bottom of the table area.

4. Go to the corrupt EDB folder location:

- Rename the EDB folder name to **NAME\_old**.

For instance, if your EDB folder name is **TestEdbToPst**, rename it to **TestEdbToPst\_old**.

5. Now you can start all three stopped services :-

- Microsoft Exchange Information Store
- Microsoft Exchange Search Host controller
- Microsoft Exchange Search Service

6. Open Exchange admin center and mount the database. It will prompt the following message, click 'OK' to create an *empty Database*.

### warning

At least one of this store's database files is missing. Mounting the store will force the creation of an empty database. Don't take this action if you intend to restore an earlier backup or recover using a continuous replication copy of your database.  
Are you sure you want to continue?

ok

cancel

7. This process will create a new **Dial Tone Database** with the same name.

- Remote Desktop Connection

#### 9. Outlook users will see a prompt to restart the Outlook application on their computer. Users also get an option to use a **temporary mailbox** for sending and receiving emails when the Outlook restarts.

## Microsoft Exchange

Your mailbox has been temporarily moved on Microsoft Exchange server. A temporary mailbox exists, but might not have all of your previous data.

You can connect to the temporary mailbox or work offline with all of your old data. If you choose to work with your old data, you cannot send or receive email messages.

**Note :-** *The temporary mailbox helps maintain business continuity while you restore the database.*

### Step 2- To Export Mailboxes from Corrupt or Dismounted Database to Dial Tone Database:

You need **Stellar Repair for Exchange** to export mailboxes from a corrupt or dismounted database to an empty database. The software scans the corrupt **Exchange Database (EDB)** file and exports all mailbox items including emails, contacts, attachments, calendars, tasks, notes, journals, and other folders to the **Dial Tone Database** on the **Live Exchange server**. It automatically maps the users and exports data to respective users mailboxes.

To know how to export the mailboxes from corrupted EDB files using **Stellar Repair for Exchange**, refer to the **Stellar Repair for Exchange** User Manual.

# Importing PST file in MS Outlook

## To import PST file in Microsoft Outlook 2019:

- Open Microsoft Outlook. From **File Ribbon**, select **Open & Export**.
- Select **Import / Export** option from the right pane.
- From **Import and Export Wizard** window, select **Import from another program or file**, click **Next**.
- In **Import a File** dialog box, select **Outlook Data File (.pst)**, click **Next**.
- Click **Browse** to locate the PST file that needs to be imported. In the options box, select an appropriate option. Click **Next**.
- In **Import Outlook Data File** dialog box, select the folders that should be imported in Microsoft Outlook. Click **Finish**.

## To import PST file in Microsoft Outlook 2016 / 2013:

- Open Microsoft Outlook. From **File Ribbon**, select **Open & Export**.
- Select **Import / Export** option from the right pane.
- From **Import and Export Wizard** window, select **Import from another program or file**, click **Next**.
- In **Import a File** dialog box, select **Outlook Data File (.pst)**, click **Next**.
- Click **Browse** to locate the PST file that needs to be imported. In the options box, select an appropriate option. Click **Next**.
- In **Import Outlook Data File** dialog box, select the folders that should be imported in Microsoft Outlook. Click **Finish**.

## To import PST file in Microsoft Outlook 2010:

- Open Microsoft Outlook. From **File Ribbon**, select **Open -> Import**.
- From **Import and Export Wizard** window, select **Import from another program or file**, click **Next**.
- In **Import a File** dialog box, select **Outlook Data File (.pst)**, click **Next**.
- Click **Browse** to locate the PST file that needs to be imported. In the options box, select an appropriate option. Click **Next**.
- In **Import Outlook Data File** dialog box, select the folders that should be imported in Microsoft Outlook. Click **Finish**.

**To import PST file in Microsoft Outlook 2007:**

- Open Microsoft Outlook. From **File ribbon**, select **Import and Export**.
- From **Import and Export Wizard** window, select **Import from another program or file**, click **Next**.
- In **Import a File** dialog box, select **Personal Folder File (PST)**, click **Next**.
- Click **Browse** to locate the PST file that needs to be imported. In the options box, select an appropriate option. Click **Next**.
- In **Import Personal Folders** dialog box, select the folders that should be imported in Microsoft Outlook. Click **Finish**.

# FAQs

## 1. What does Stellar Repair for Exchange do?

The software repairs corrupt EDB files and restores all its data such as e-mails, attachments, contacts, calendars, notes, tasks and journals. **Stellar Repair for Exchange** provides the preview all scanned data and gives options to export data to **Live Exchange, Public Folder, Office 365** or save in **PST, MSG, EML, RTF, PDF and HTML** format.

## 2. What is the difference between an .EDB file and a .STM file?

The .EDB file is the main repository for the mailbox data. The .STM or streaming media file is used in conjunction with the .EDB file to comprise the Exchange database. Both files together make up the database, and as such, they should always be treated as a single entity. Typically, if you perform an action on the .EDB file, the .stm file is automatically included. The purpose of the .STM file is to store streamed native Internet content.

When you install a new Exchange server in an organization, two data stores are created automatically: a default mailbox store and default public folder store. Two database files are associated with the default mailbox store:

**Priv1.EDB:** A rich-text database file containing message headers, message text, and standard attachments.

**Priv1.STM:** A streaming internet content file containing audio, video and other media that are formatted as streams of Multipurpose Internet Mail Extensions (MIME) data.

The .stm file houses Internet content message streams as defined in Request for Comments (RFC 822), and the .edb file contains messages that are in MAPI format (Rich Text Format).

When an Internet mail message comes into the Exchange information store, the body of the message is saved in the .stm file, and the header information (From, To, Cc, Time Sent, and so on) is converted to Rich Text Format (RTF), and then stored in the .edb file.

## 3. How much time will the Stellar Repair for Exchange Software take to repair an EDB file?

The scan process time depends upon the corruption level, size of the EDB file and also on the mode of scanning you choose while initiating the scan process in **Stellar Repair for Exchange**. If you use **Quick Scan** mode, scanning is faster than **Extensive Scan** which provides better and effective scanning results.

## 4. How can I save my contacts?

You have two options to save your contacts:

1. From **Tools** Ribbon and select **Save Contacts**. Use this option to save the repaired contacts from the mailbox in **.CSV** format.
2. From **Navigation tree** while on **Mail tab**, select **Contacts** from the tree and select **Save** icon from **Home** Ribbon. Refer to **Save Scanned files** section for further process.

## 5. What is difference between Quick Scan and Extensive Scan?

Quick Scan mode is a fast mode to scan and repair corrupt EDB file. If you are not satisfied with the Quick Scan mode, then you can try Extensive Scan mode. Extensive Scan mode of scanning an EDB file is slow but more effective process. This mode is more powerful than Quick Scan mode. It is able to repair even highly corrupted EDB files.

**6. My MS Exchange Server 2013 crashed. I installed a new MS Exchange Server 2019 and want to import my mailboxes from MS Exchange Server 2013. Is it possible with your software?**

Yes, **Stellar Repair for Exchange** allows you to repair the corrupt and crashed server database files and export them in **Live Exchange Server**.

**7. How do I mount the corrupt and dismounted database?**

**Dial Tone Recovery** is a process of using the **Dial Tone Portability** feature available in **Microsoft Exchange Server**. The feature provides an empty Exchange database (with the same database schema version) that allows users who had mailboxes on the failed and dismounted database to send and receive new emails. By Using **Dial Tone Recovery**, you can mount the corrupt and dismounted database. To know more information, click [here](#).

**8. Can I export mailbox to the Public Folder of MS Exchange server or Office 365 using Stellar Repair for Exchange?**

Yes, you can export mailbox to the public folder of **Exchange Server or Office 365**. To know how to export, click [here](#).

**9. I am trying to repair an EDB file and export the data to Office 365. When I enter the Mail ID and Password, the system shows an error. What can I do?**

The application shows error because of following reasons,

1. If the credentials (Admin ID and Password) you have entered is incorrect.
2. The Admin credentials you have entered do not have required permissions to export data to Office 365.
3. There is a connection failure with internet. In that case, check your network connection and try again. If your internet is working, check your firewall and anti-virus software settings for any blockage.
4. There is a server issue because of which server is not able to create a connection with **Office 365**. Check if you are able to connect to Office 365 outside the **Stellar Repair for Exchange** application and try again.

**10. I am not able to find my EDB file, how do I locate it?**

Use **Find EDB** option to search and locate the EDB files.

**11. I want to repair my Calendars and Contacts, how do I repair them using Stellar Repair for Exchange?**

First you need to repair mailboxes from the EDB file using the software, refer to Working with the Software section of this guide. Then, you can save the Calendars and Contacts folder in the PST format for outlook, refer to the Save Mailbox to PST, MSG, EML, HTML, RTF, PDF section to know the steps.

**12. Can I export the repaired mailbox to Live Exchange or Local Exchange Server?**

Yes, you can export the repaired mailbox to an Exchange Mailbox. Refer to Save Scanned Files section for complete steps.

#### **13. How many files can be scanned at one time ?**

**Stellar Repair for Exchange** scans maximum of four files at a time.

#### **14. What is mapping of mailboxes ?**

Mapping is a feature that automatically loads/subscribe source mailbox to destination mailbox having full-mailbox permissions.

#### **15. What should I do if I get an error "A required DLL could not be registered." ?**

Refer to the link to view the details <https://www.stellarinfo.com/support/kb/index.php/article/register-phoenixdll-dll>

#### **16. I don't want to export the system generated files while saving the mailbox. Is there any option to exclude these files?**

Yes, you can select **Don't export MS Exchange generated folder** check-box while saving the repaired EDB file. By default, it is always checked. This feature is only applicable for EDB files of MS Exchange 2010 and higher versions.

#### **17. What is a Public folder and how to export data to that folder?**

**Public Folder** is one of the feature within **Microsoft Exchange** and **Office 365** which gives users access to common folders for sharing information. To export the mailbox to the **Public Folder**, you must have full-mailbox permissions and full access to public folder root for the **Exchange Server** or **Office 365** where you want to export the mailbox. See Export Mailbox to Public Folder, to know how to export the mail files.

#### **18. Is it necessary to have administrative credentials to export the data to Live Exchange Server and Office 365?**

Yes, you must have administrative credentials and permissions to export the data to **Live Exchange Server** and **Office 365**.

#### **19. Does the application maintain a log of the complete repairing and saving process?**

Yes, select **Log Report** from the **View** ribbon. In the **Log Report**, you can get all the information related to scanned files and exported data. See View Log Report, for more information.

#### **20. After saving my repaired mailbox in PST format. How to view and access the mailbox items?**

After you have saved the repaired mailbox in **PST** format, you can import the **PST** file in **MS Outlook**. See Importing PST file in MS Outlook, to know how to import PST file.
